Welcome to the ASML M365 Copilot Use Case Library

This is your central page to **discover, learn** and **share** how M365 Copilot is used across ASML.

- 🔍 **Discover** practical use cases from colleagues
- 📘 **Learn** different ways to use Copilot in your daily work
- 📤 **Share** your best use cases to help others benefit from your experience

This library is designed for M365 Copilot license holders to discover and submit ASML-specific M365 Copilot use cases.

What is a Use Case?

A use case is **a practical example** of how Copilot can help accomplish a specific task or outcome, solve a challenge, or improve a workflow.

It goes beyond a simple one-step action (like using Copilot to summarize a document).
A strong use case typically involves **multiple steps and prompts** to show how Copilot can support you in a specific case.

Example use cases

Accelerate Data Insight and Reporting

How to discover use cases

1. Navigate to the top right of this page to find sector-specific use case pages.
2. On a sector's page, you can find sector-specific use cases.
3. Browse the gallery view and filter use cases by for example; the submitter's role, the use case benefits, and more.
4. Click on a use case to view its full details, including the steps involved and example prompts for inspiration.

How to submit use cases

1. Navigate to the top right of this page to find sector-specific use case pages.
2. On a sector's page, click "Submit Your Use Case" to open the submission form.
3. Provide all required details.
4. Review the provided information to ensure it meets the responsible use guidelines. Once confirmed, click Submit.
5. Your submission will be reviewed by the selected sector approver. Once approved, it will be visible for everyone in the sector's use case library.

Responsible Use Guidelines

When creating and submitting a use case, follow the same responsible use guidelines as when working with M365 Co
Ensure your submitted use case meets the requirements below:

Requirements for any submitted use case:

Avoid sensitive information

Do not include *Top Secret, Personally Identifiable Information (PII)*, or other restricted data types in your use case.

Anonymize examples

Ensure example prompts do not reveal sensitive or personal information (e.g., employee names).

Validate output

Always verify, validate, and cross-check any Copilot-generated content used in your use case.

Refer to the M365 Copilot Information Sources.

Questions

- For questions about ASML's Knowledge Protection & Information Handling Rules, contact: security.culture@as
- For security-related questions surrounding your work, reach out to your Security Risk Manager.

Use Case Approval Process

To ensure every submitted use case is clear, complete and compliant, it goes through an approval process.

How does it work?

1. After submitting your use case, **your sector's use case approvers will receive a request to review your use case.**
2. If approved, your use case will be **published in the Sector's Use Case Library**. If rejected, please review and adjust you based on the approver's feedback.

Sector's Use Case Approvers

Sector	Approvers Names
