Your M365 Copilot Access Steps

Follow these three steps to activate your license

Activate your license

1

Sign the Acceptable Use Policy to activate your Copilot license:

License Activation Link

Activation process

2

After signing the policy, it takes **2-3 days for your Copilot license to be activated**.

Support

3

If your Copilot license is not active after 3 days, **please reach out the technical support team**: copilot@asml.com

Let‘s check out our flight route!

You are in Session 2 – Meeting and Collaboration!

Personal Productivity

Session 1

Topic 1: Copilot Essentials & Prompting

Topic 2: M365 Copilot Chat

Topic 3: Teams & Outlook

Copilot in Teams Chat and Meetings

Overview

Copilot can help you in Teams by **summarizing important documents, catching up on communications, generating drafts of emails, and providing insights from your enterprise data** to enhance collaboration and productivity.

Copilot in Teams Chats

- Create responses to colleagues, scan chats for input and find relevant information
- Generate ideas and expand knowledge

Copilot in Channels

- Summarize main points, action items and decisions from long threads
- Take advantage of team collaboration spaces by using Copilot to quickly catch up and ask for the information you need

Covered in the Personal Productivity Training

Copilot in Teams Meetings

- Transcribe meetings
- Receive chat highlights from the past 1, 7 or 30 day(s)
- Summarize the key points of meetings
- Identify decisions and open action items from meetings

Copilot in Teams Chat and Meetings

Limitations

Limitations in Teams

- Copilot works in channels, but it requires that you **open the replies to the thread or open the thread in a new window** and then works like normal Copilot in team's chats
- Copilot **cannot transcribe ad-hoc meetings**, only meetings that are planned with a calendar invite and the owner of the event
- When using Copilot during a meeting, it will utilize the transcript but will not store it. This means you can interact with Copilot only during the meeting. **To interact with Copilot after the meetings ends, ensure you record and transcribe the meeting**

General use cases (1/2)

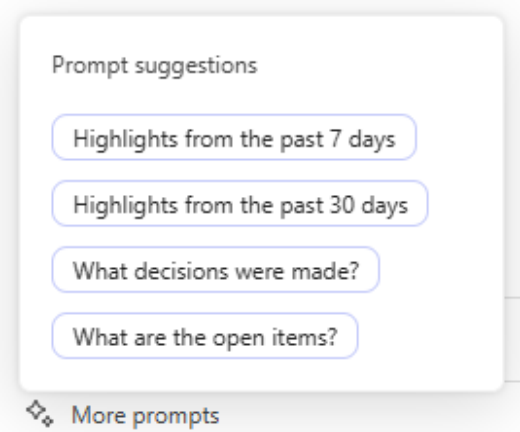
Before, during, and after Teams meeting functionalities

Before a Teams meeting

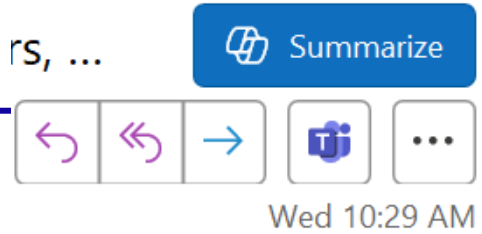
Save time and be prepared for a Teams meeting, bringing the best value to the meeting.

- **In Teams**, you can ask for meeting content in Teams chats or channels
- **In Outlook**, you can summarize mails from previous meeting content or a specific person
- **In M365 Copilot Chat**, you can review main points, action items or decisions about a meeting.

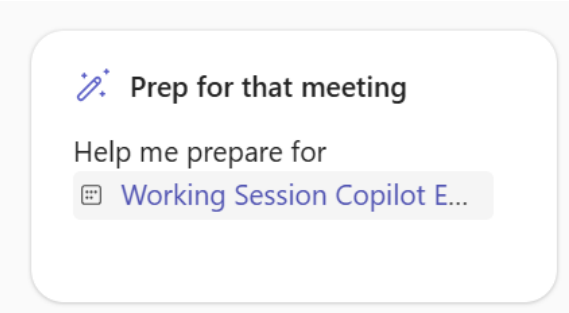
Teams



Outlook



M365 Copilot Chat



General use cases (2/2)

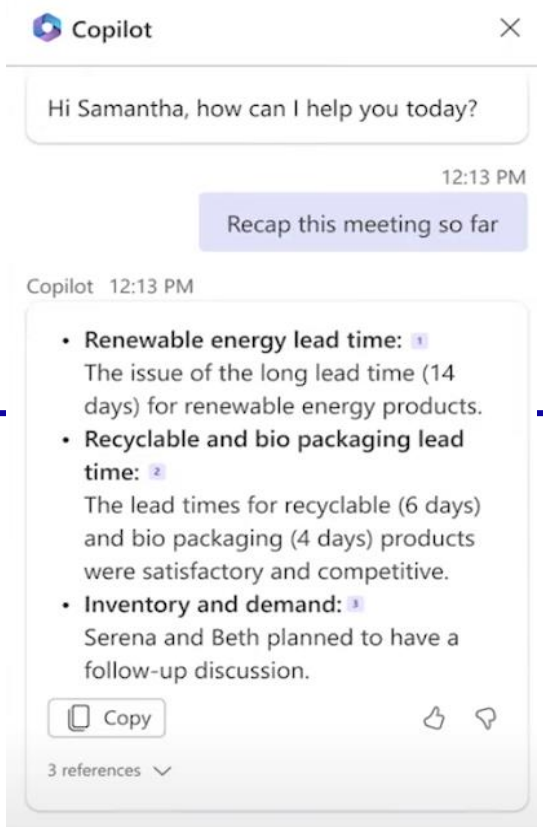
Before, during, and after Teams meeting functionalities

During a Teams meeting

Copilot can facilitate the meeting by:

- Generating meetings notes
- Summarizing key discussion points
- Suggesting action items
- Identifying where people are aligned or disagreeing in real-time

Asking Copilot for a **summary of the discussions** can be useful to catch up swiftly if you join a meeting late or if you encountered connection issues.



After a Teams meeting

As your meeting closes (10 min before end), Copilot sends out a **notification to assist with the wrap-up.**

You can ask Copilot questions about the meeting content after the meeting ends as:

- Summarizing the discussion
- Suggesting follow-ups
- Listing action items

Always make sure **to stop the recording and that everybody is leaving the meeting** to receive recap functions after the meeting.

2.3 Prompting

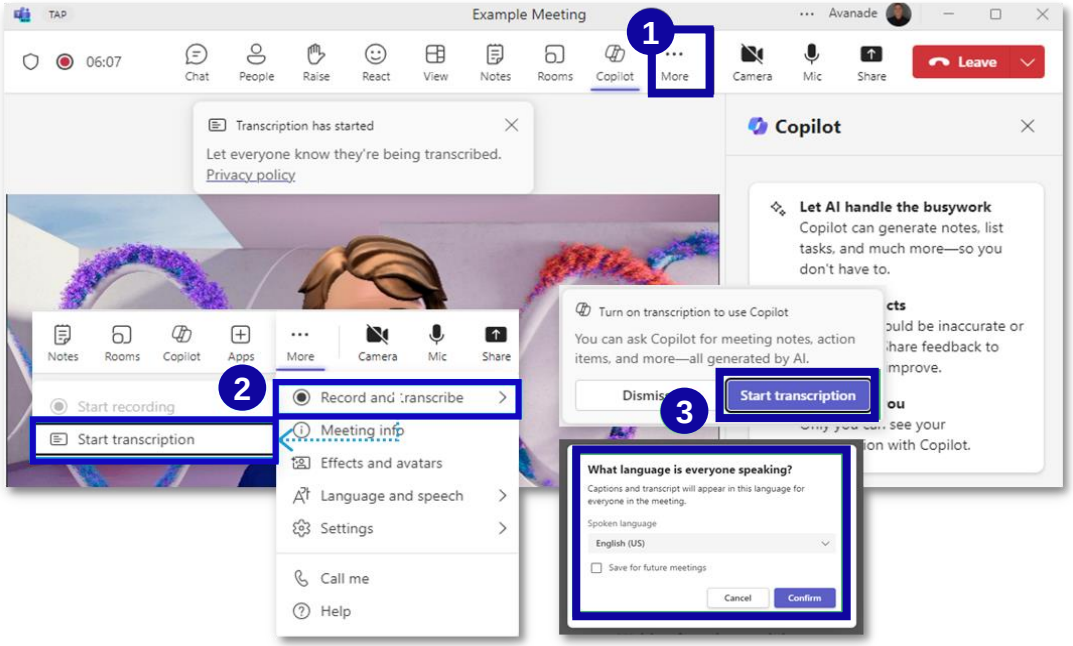
ASML

Transcribing Teams meetings

Use case

Teams | Access

1. Click on **"More"** on the right of your Copilot button in the meeting you organized
2. Click on **Record and Transcribe** and **Start transcription** to begin transcriptions
3. Confirm the **transcription language** and start the transcription



Copilot in Teams calls - Transcriptions

- Recap conversations, organize key discussion points, and summarize key actions
- Get answers to specific questions, catch up on things you've missed
- Create meeting agendas based on chat history
- Identify individuals for follow-ups, and scheduling the next check-in
- Create meeting summaries, to-do lists and action items per person

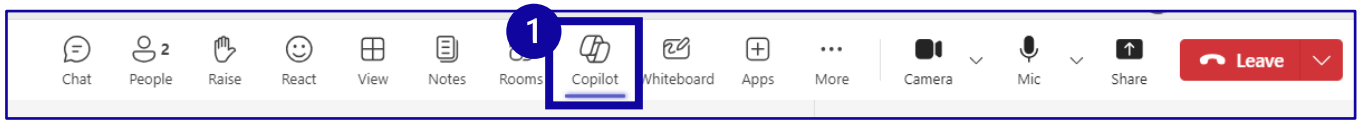
Tips & Reminders:

- Transcription only starts **from the moment you turn it on**
- **Always inform participants** that transcription is turned on
- To **interact with Copilot after the meetings ends**, ensure you record and transcribe the meeting

Exercise 1: Recap Teams meeting so far

Let’s practice together!

Teams | Access

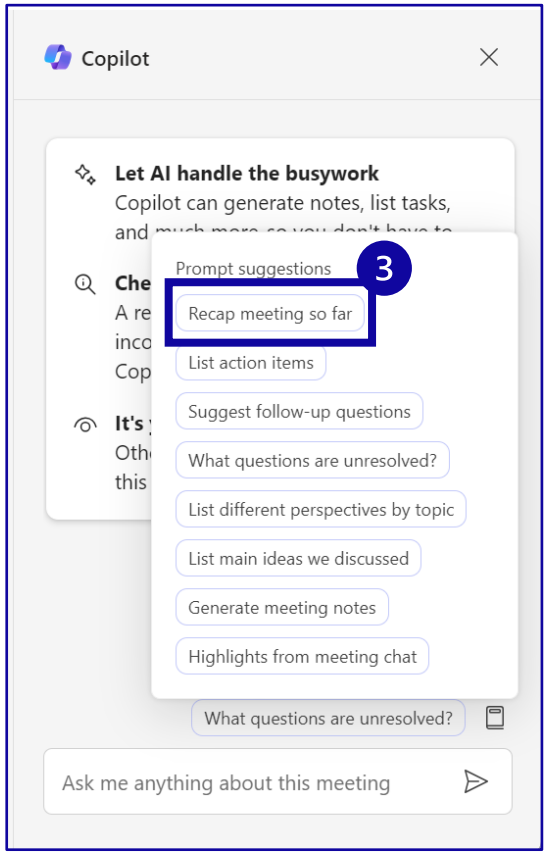


1. On this **current Teams meeting**, look for and click on the **Copilot icon** on the top menu bar

2. The sidebar **Copilot window** will open. Please click on the little icon at the bottom right to open the **prompt suggestions**

3. Click on the first prompt suggestions: ***Recap meeting so far***

Check the credibility of the response and share your feedback in the chat!



Recap Teams meetings from the past

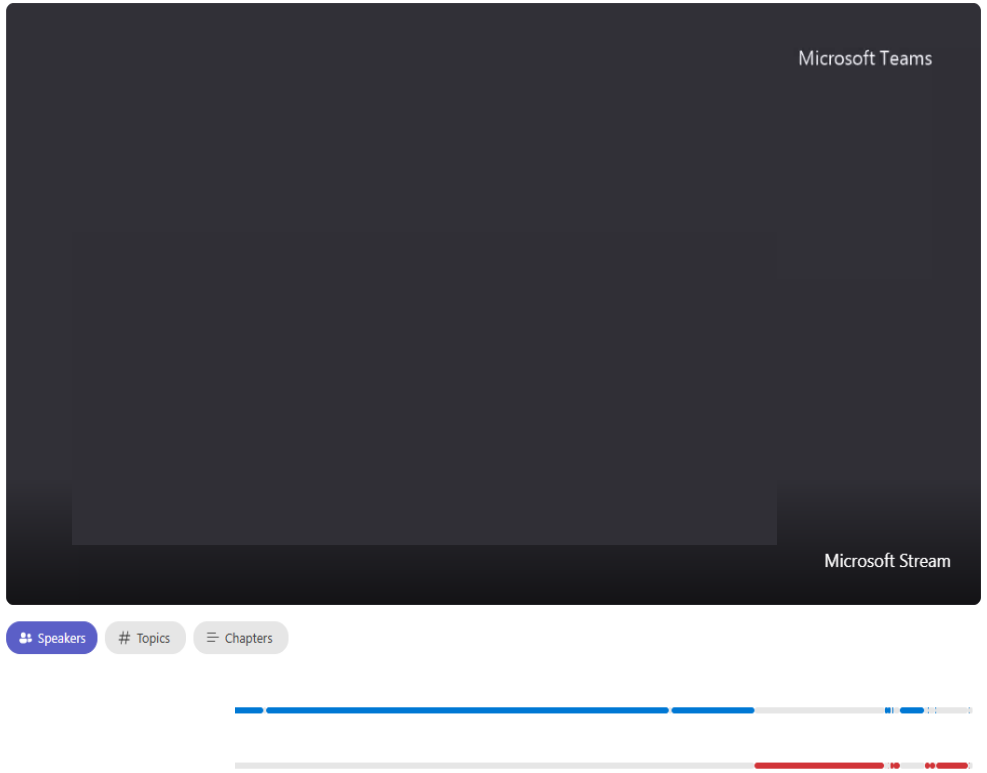
Use case

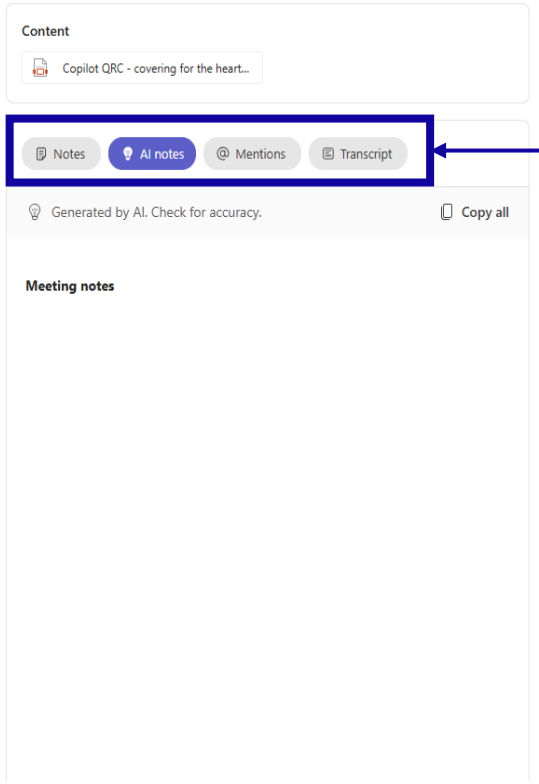
Teams | Access

1) Recap Tab

2) Activate Copilot

To activate Copilot, select the Copilot icon from the top right-hand side of the meeting chat or of the Recap tab if you are already in





3) Key Features

- **Notes:** Generates comprehensive meeting notes with Loop Components, that can be shared with all participants
- **AI Summary:** After a meeting, Copilot can generate a summary of the key discussion points, decisions made and action items.

Note: Transcription need to be turned on to benefit from this feature.

- **Mentions:** Copilot highlights any action items assigned to you and mentions of your name during the meeting.
- **Transcript:** Access to the transcription of your past meetings, when activated.

2.3 Prompting

ASML

The Art of Prompting in Teams (meetings)

4 key ingredients of a prompt

Goal
What do you want from Copilot?

+

Context
Why do you need it and who is involved?

+

Expectations
How should Copilot respond to best fulfil your request?

+

Source
What information or samples do you want Copilot to use?

Prompting Tips and Tricks

Be detailed and draft **specific prompts**

Leverage M365 integration by **adding references** to enrich the response

Always **iterate and refine prompts**

Use **pre-build prompts** for common tasks to save time

Exercise 2: Quality prompting in Teams chats

Let‘s practice together!

Teams | Prompting

1. Open **M365 Copilot Chat in Teams**
2. Use the following prompt: ***Summarize Teams messages where I have been @mentioned this week.***
3. **Check the reliability of the answer and share feedback in the chat!**

Digital
Transformation
Engine

3. Copilot in OneNote

Application Training

3.1 Benefits and use cases

3.2 Access

3.3 Prompting

ASML

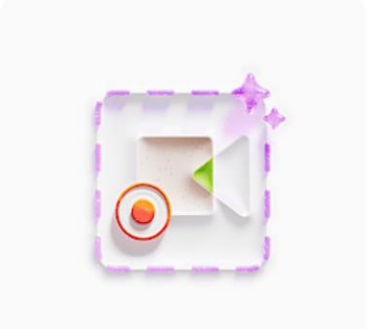
Copilot in OneNote

Overview

Copilot in **OneNote** supports your creativity by helping you brainstorm, edit, and query your notes.

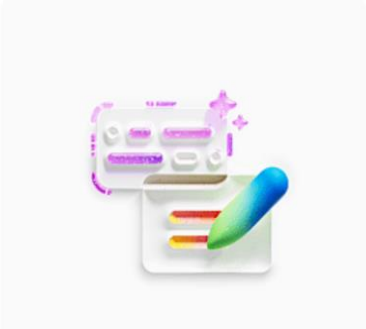
! Limitations in OneNote !

- Copilot **cannot reference external files, and you need to import** content directly into pages
- Copilot is **unavailable for web version** of OneNote
- Users need to **define parameters** of the Copilot query to limit expansive content



CREATE

Generate and query content across selected text, pages, and notebooks



EDIT

Sort and filter content with assistance from Copilot

UNDERSTAND

Summarize your notes and identify key points within materials

CHAT

Generate to do lists and plans and ask questions in natural language about notes

Digital
Transformation
Engine

Application Training

3.1 Benefits and use cases

3.2 Access

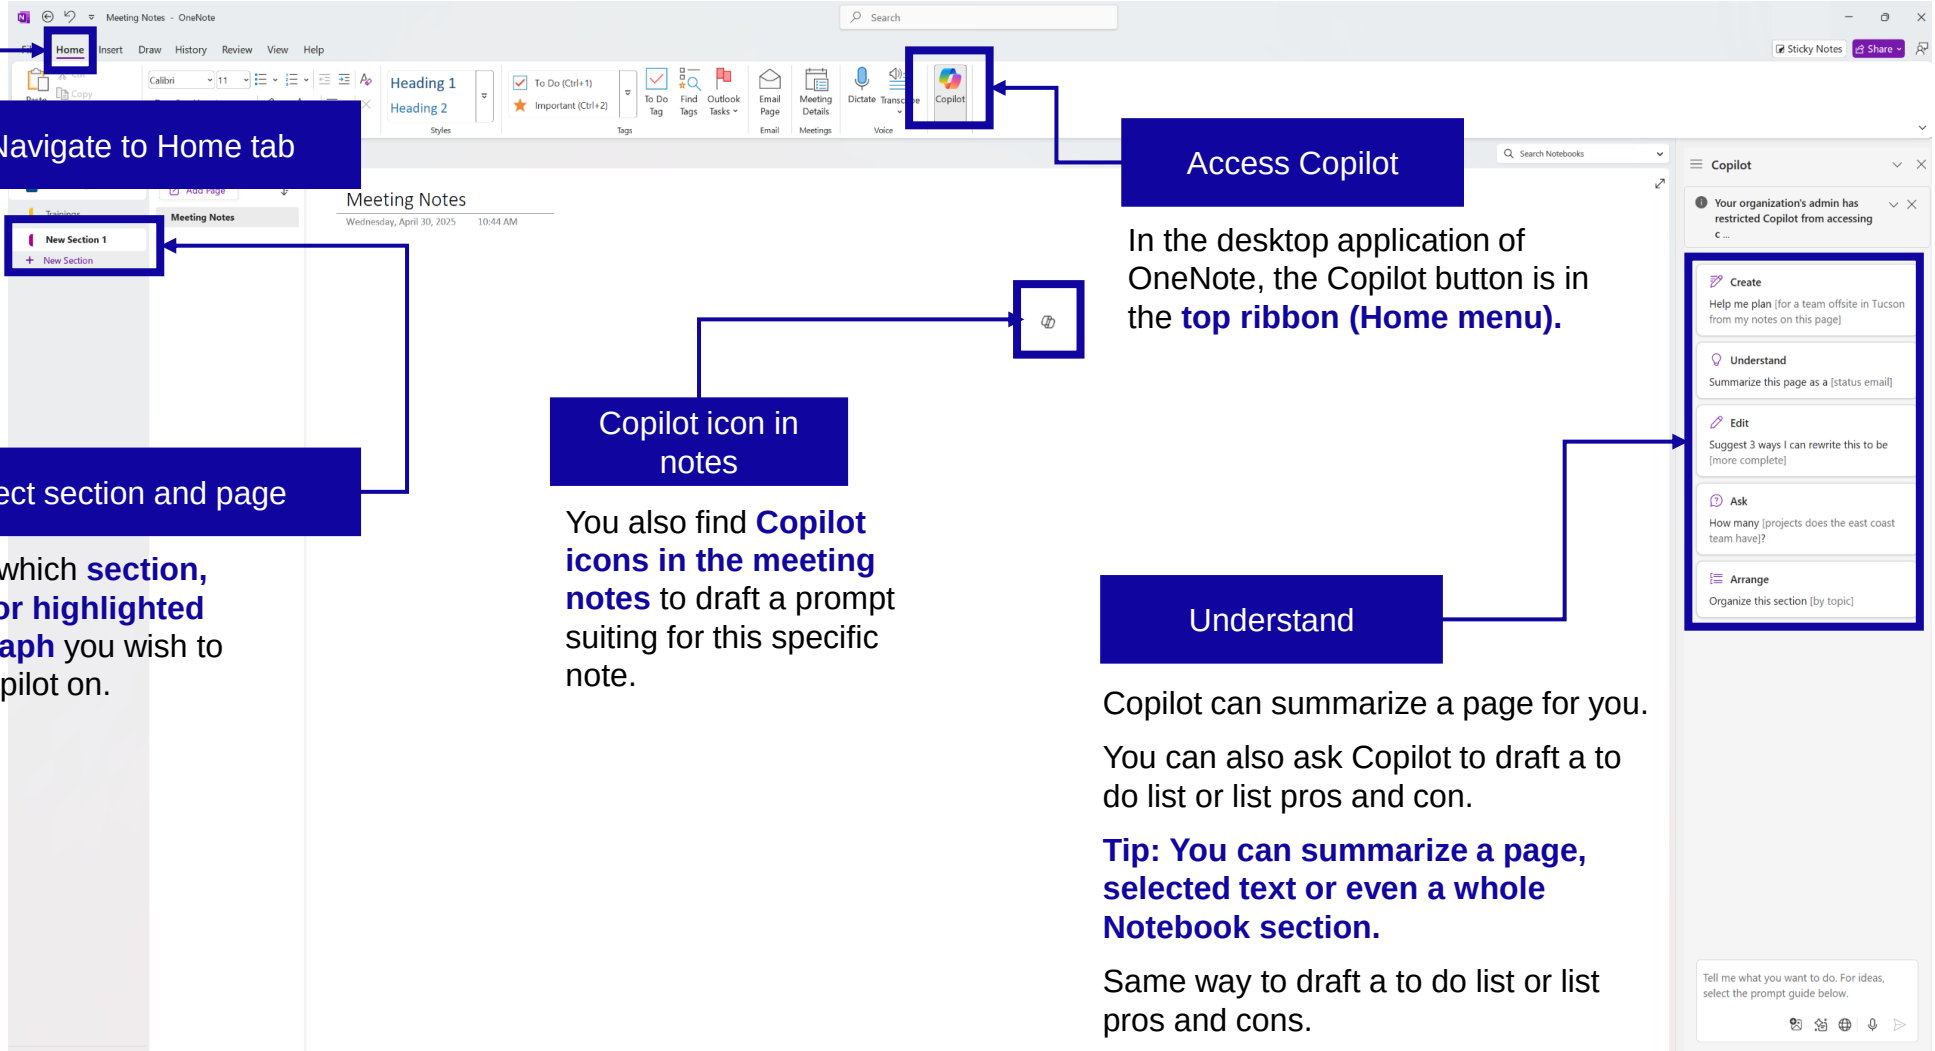
3.3 Prompting

ASML

Exercise 3: Access Copilot in OneNote

Let‘s practice together!

OneNote | Access



Navigate to Home tab

Access Copilot

In the desktop application of OneNote, the Copilot button is in the **top ribbon (Home menu).**

Select section and page

Select which **section, page, or highlighted paragraph** you wish to use Copilot on.

Copilot icon in notes

You also find **Copilot icons in the meeting notes** to draft a prompt suiting for this specific note.

Understand

Copilot can summarize a page for you.

You can also ask Copilot to draft a to do list or list pros and con.

Tip: You can summarize a page, selected text or even a whole Notebook section.

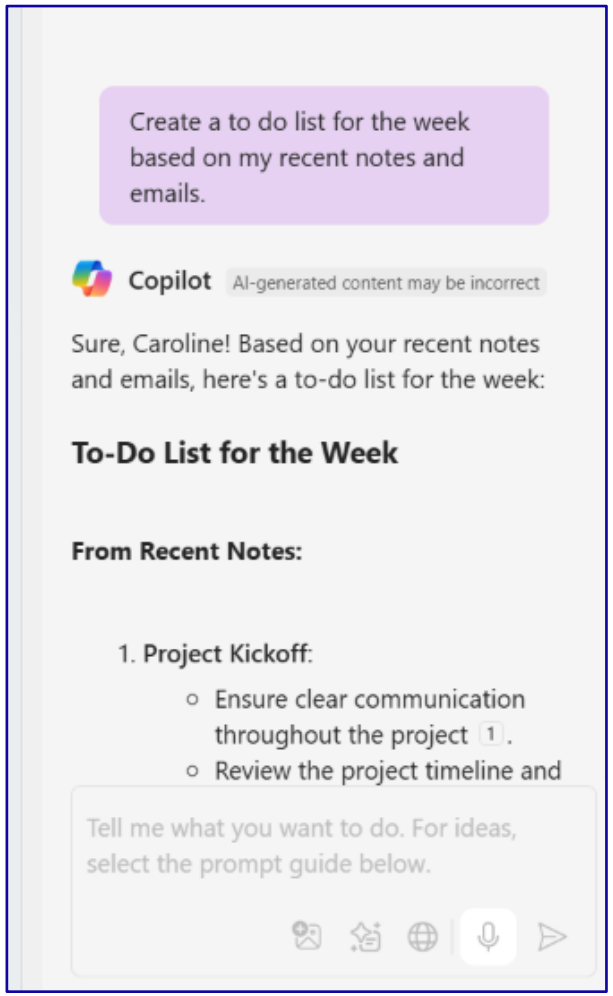
Same way to draft a to do list or list pros and cons.

Exercise 4: Create a to do list with Copilot in OneNote

Let‘s practice together!

OneNote | Access

1. Use Copilot to create a to-do list for the week, based on your recent notes and emails
2. You can use the following prompt:
   Create a to-do list for the week based on my recent notes and emails.
3. **Check the reliability of the response and share your feedback in the chat!**



Essential prompt ingredients:

Goal — What do you want from Copilot?
+
Context — Why do you need it and who is involved?
+
Expectations — How should Copilot respond to best fulfil your request?
+
Source — What information or samples do you want Copilot to use?

3.3 Prompting

ASML

Drafting ideas with Copilot (1/3)

Prompt examples in OneNote

OneNote | Prompting

Example: Suggest ideas

Prompt used

Generate ideas to overcome the challenges that were listed during the meeting about the marketing strategy at ASML. List three main ideas and keep it short.

Result

1.Enhance Digital Presence: Invest in advanced digital marketing tools and strategies to improve online visibility and engagement. This includes leveraging SEO, social media marketing, and targeted advertising to reach a broader audience.

2.Customer-Centric Approach: Develop personalized marketing campaigns based on customer data and insights. This will help in creating more relevant and engaging content that resonates with the target audience, ultimately driving higher conversion rates.

3.Collaborative Innovation: Foster collaboration between different departments such as marketing, sales, and product development to create innovative marketing strategies. Regular brainstorming sessions and cross-functional teams can help in generating fresh ideas and ensuring alignment with overall business goals.

Example: Query Copilot on notes

Prompt used

What was the outcome of the vote?

Result

According to the current section: The outcome of the vote was as follows:

- SkyGourmet Airlines Catering (SGAC) received 0 votes in favor and 7 against.
- AeroBites Culinary Services received 5 votes in favor and 2 against.
- MegaMunch Airline Catering received 2 votes in favor and 5 against.

Based on the results, AeroBites Culinary Services received the most votes in favor. [1] [2]

Drafting ideas with Copilot (2/3)

Prompt examples in OneNote

OneNote | Prompting

Example: Create to do lists based on a specific cluster

Prompt used

Create a to-do list for my current project, including tasks such as research, drafting, and review.

Result

Research

1.Gather Information: Collect relevant data and insights from various sources, including internal documents and external references.

2.Analyze Data: Review and analyze the collected data to identify key trends and insights that will inform the project.

Drafting

1.Outline Structure: Create a detailed outline of the project, including key sections and sub-sections.

2.Draft Content: Write the initial draft of the project, ensuring that all key points are covered and the content is well-organized.

Review

1.Peer Review: Share the draft with colleagues for feedback and suggestions. Incorporate their input to improve the content.

2.Final Review: Conduct a thorough review of the final draft to ensure accuracy, clarity, and completeness.

Drafting ideas with Copilot (3/3)

Prompt examples in OneNote

OneNote | Prompting

Example: Write a message based on notes

Prompt used

Write a message based on the selected text to inform the team members from the Marketing department about the outcome of the meeting. Add the action items for the Marketing department. Use a formal tone.

Result

Subject: Outcome of the Marketing Strategy Meeting and Action Items

Dear Team,

I hope this message finds you well.

I am writing to inform you about the outcome of our recent meeting regarding the marketing strategy at ASML. The meeting was held on April 30, 2025, and attended by Caroline Muller, Monique van den Biggelaar - Tindemans, Jules Smeets, Maud Jennen, Eleni Veli, and Carolin Müller.

Outcome of the Meeting:

1.Project Kickoff: The importance of clear communication throughout the project was emphasized. An overview of the project goals and objectives was provided, along with the initial timeline and milestones. Roles and responsibilities were assigned to each team member.

2.First Status Update: Progress since the kickoff meeting was reviewed. A minor issue with the CRM system integration was mentioned, and a slight adjustment to the timeline was suggested to accommodate this issue.

3.Mid-Project Review: The project is on track and within budget. A concern about potential delays in the mobile application development was raised, and a risk mitigation plan was recommended.

4.Final Status Report: All project deliverables have been met. A summary of the CRM system's successful implementation was provided, and the final steps for project closure and handover to the client were discussed.

Action Items for the Marketing Department:

1.Enhance Digital Presence: Invest in advanced digital marketing tools and strategies to improve online visibility and engagement. This includes leveraging SEO, social media marketing, and targeted advertising to reach a broader audience.

2.Customer-Centric Approach: Develop personalized marketing campaigns based on customer data and insights. This will help in creating more relevant and engaging content that resonates with the target audience, ultimately driving higher conversion rates.

3.Collaborative Innovation: Foster collaboration between different departments such as marketing, sales, and product development to create innovative marketing strategies. Regular brainstorming sessions and cross-functional teams can help in generating fresh ideas and ensuring alignment with overall business goals.

Please ensure that these action items are addressed promptly and effectively. Your dedication and hard work are greatly appreciated.

Best regards,

Caroline Muller

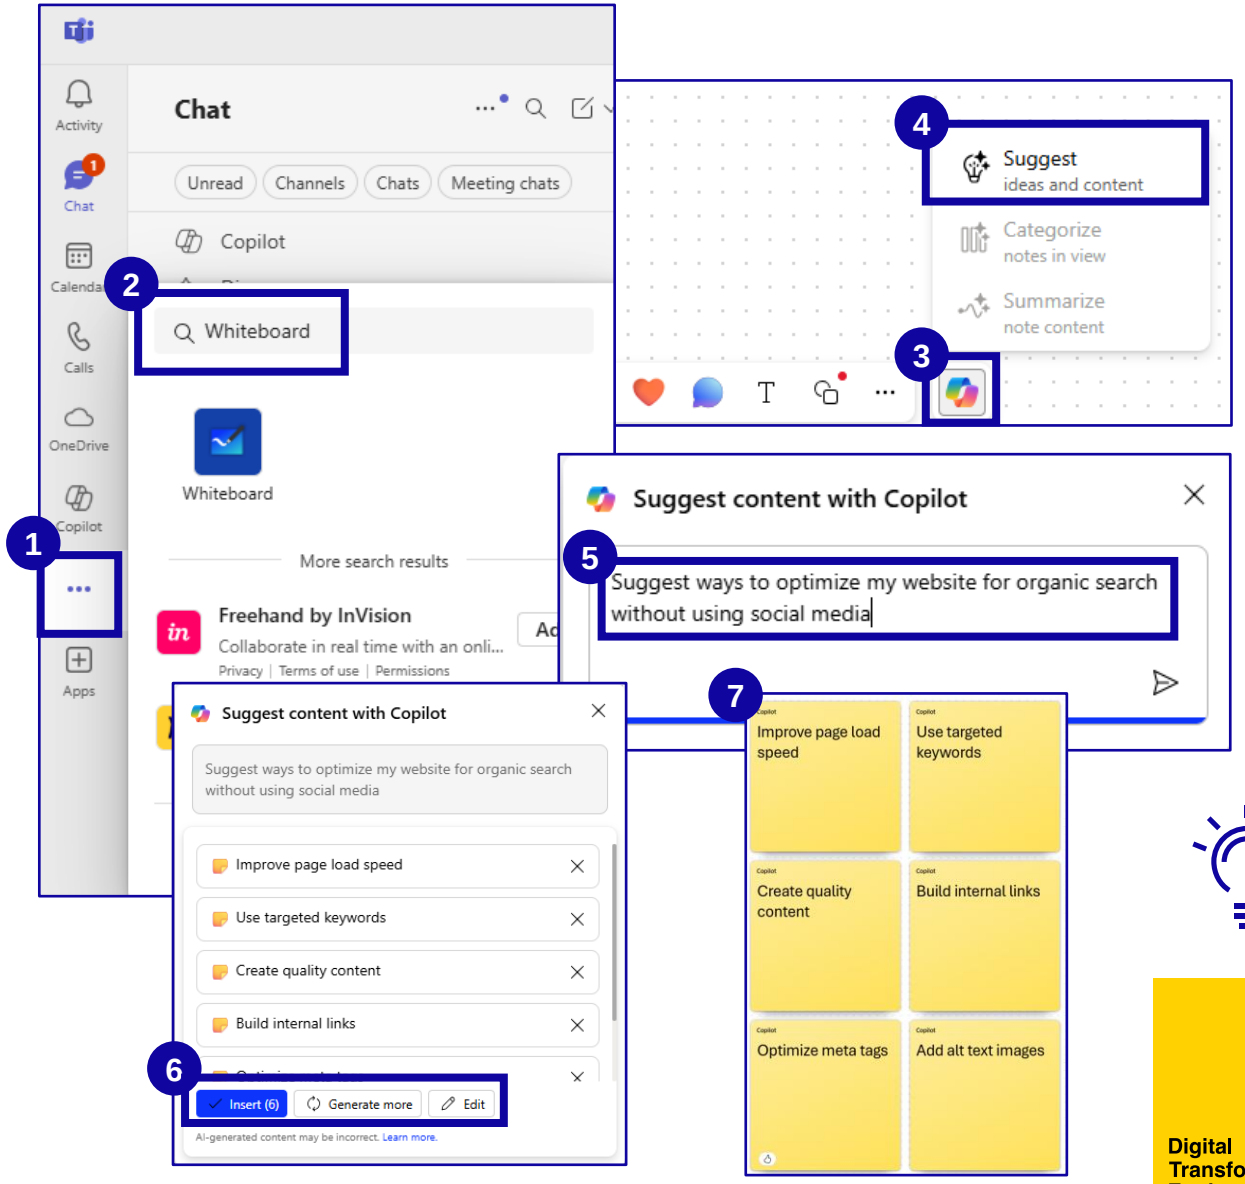
Exercise 5: Access Copilot in Whiteboard (via Teams)

Let’s practice together!

Whiteboard | Access

1. **Look** for your Whiteboard app directly within your Teams app, by clicking on the three dots on the left bar of your Teams app
2. Then, type “whiteboard” if the app does not appear directly and open the Whiteboard app
3. Click on the **Copilot button** which is in the bottom bar in Whiteboard.
4. **Choose** the category “Suggest” for leverage Copilot
5. Let Copilot help you to **suggest content** for your new Whiteboard
6. Copilot offers you content for your Whiteboard – you can **insert them, edit them, or generate more**
7. After clicking on **“insert”, Copilot includes the generated content** in your Whiteboard

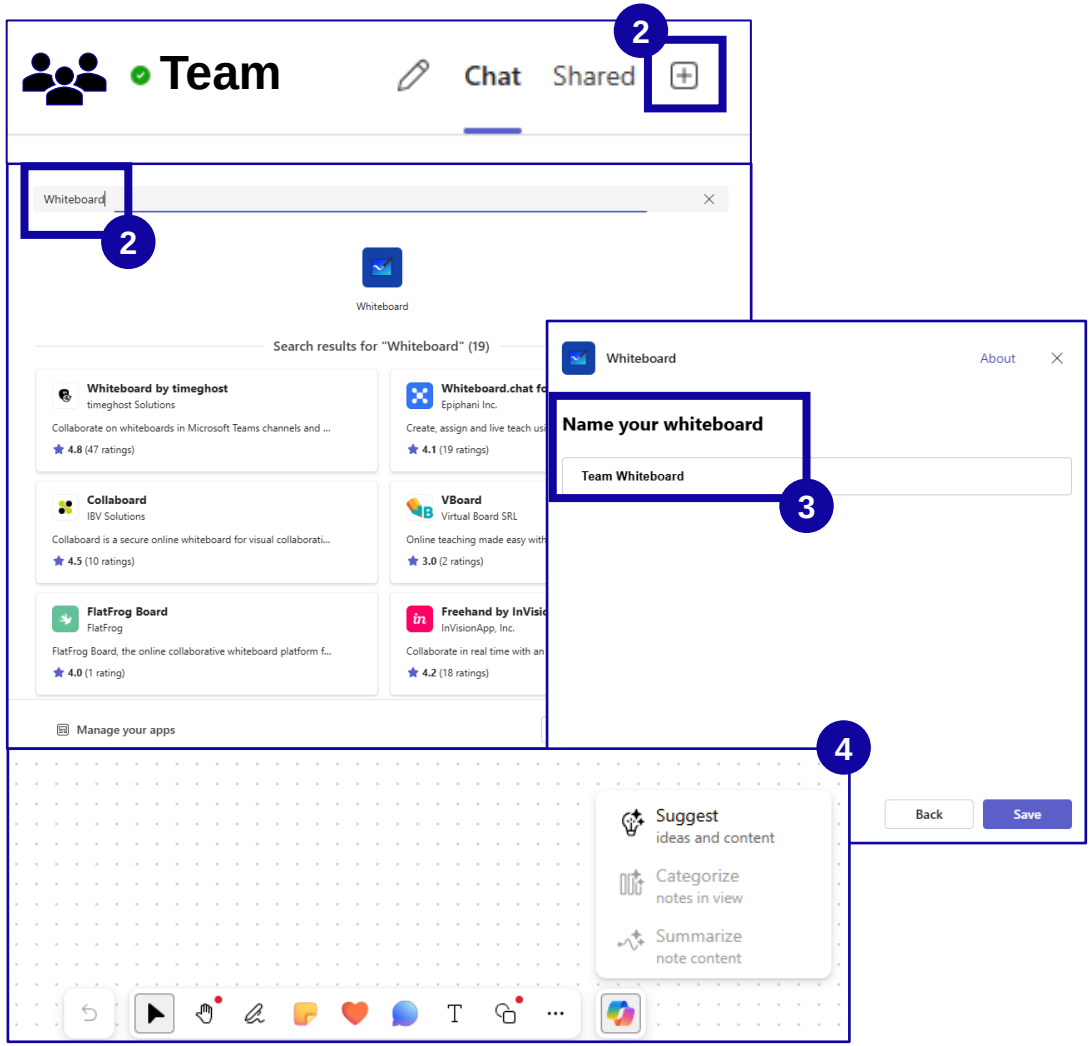


Exercise 6: Access Whiteboard in a group chat

Let’s practice together!

Whiteboard | Access

1. **Look** for Whiteboard in a **group chat** by clicking on the app next to the group name
2. If you cannot find it, click on the **“+”** and search for Whiteboard
3. Include Whiteboard and **give it a name**
4. Use **Copilot** in your team Whiteboard as usual



Exercise 7: Access Whiteboard in a meeting

Let’s practice together!

Whiteboard | Access

1. **Look** for Whiteboard in a **meeting chat** by clicking on the app next to the meeting name

2. Use **Copilot** in your meetings Whiteboards as usual

5.3 Prompting

ASML

Copilot in Loop

Overview

Copilot in Loop is a powerful tool designed **to enhance collaboration and productivity within Loop components**.

Copilot integrates seamlessly **with other M365 apps, allowing you to share and edit Loop components** as interactive elements within these apps.

CO-CREATE

Copilot allows team members to edit simultaneously, making easier to change the tone, length and format of the content collaboratively

TRANSFORM CONTENT

Copilot helps you draft, brainstorm and rewrite content directly within Loop components.

STAY UP TO DATE

Copilot can assist in organizing tasks, planning events and managing projects by generating outlines, plans and strategies.

Copilot in Loop

Use cases

How can Copilot in Loop help me?

- You can immediately **share Copilot responses with your team** by creating a side-by-side page that you can edit and share
- Everyone can **add content to this page**, although you as the original creator, are the only one that can use it within M365 Copilot Chat
- A **Loop Component** is:
  - **Persistent:** It takes AI-generated content and makes it durable, allowing you to edit and add to it
  - **Shareable:** Any page you create can be shared as a Loop element across Teams/Outlook/any other M365 app
  - **Multiplayer:** Work collaboratively with your teammates

It is your data!

- The Page you have generated – and possibility shared – is a **Loop component**
- Loop is integrated within **Teams**, allowing you to seamlessly add dynamic Loop components to your chats for more interactive and efficient collaboration
- When **shared as a component**, they are displayed as little interactive boxes across M365 apps
- The pages are stored in a user-owned **SharePoint container**
- You can add a **sensitivity label** to your page

Digital
Transformation
Engine

5. Copilot in Loop

Application Training

5.2 Access

5.3 Prompting

ASML

Exercise 8: Access Copilot in Loop via chats

Loop | Access

Let‘s practice together!

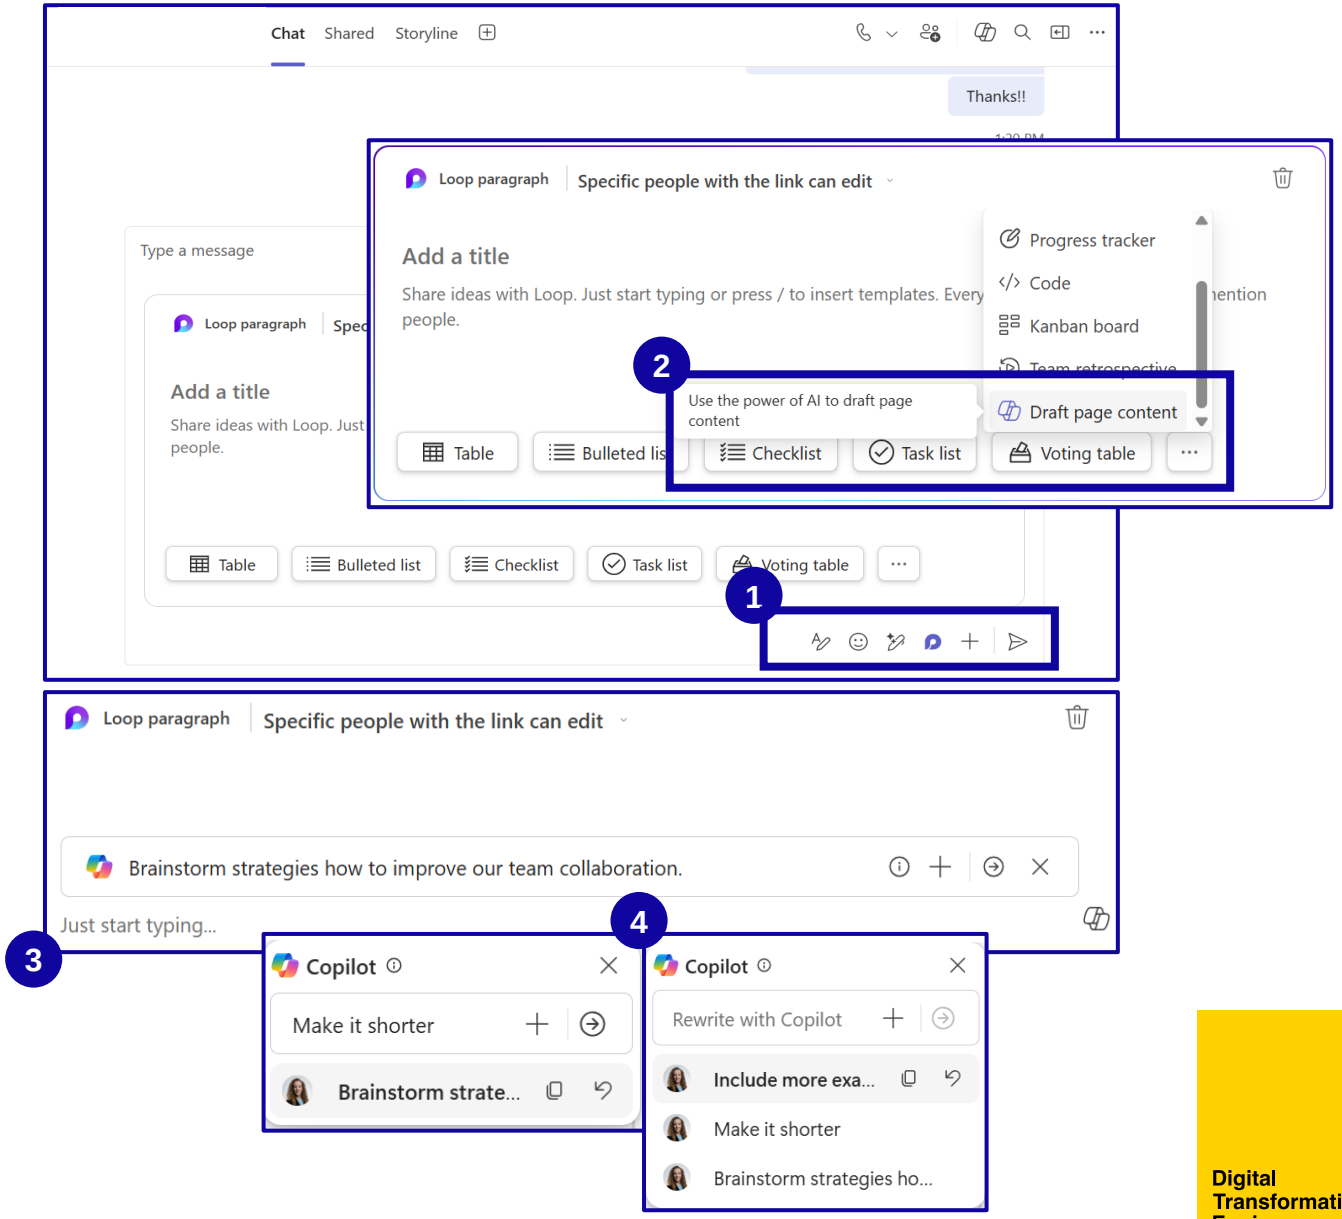
1. Open a **Teams chat with a single person or group**. Click on the **Loop icon** on the bottom bar of a message.

2. Click on the **three dots in the Loop component** and scroll down until you see the Copilot icon **“Draft page content”.**

3. Use a **prompt template** or write **any other prompt** for your Loop component.

4. **Rewrite your prompt** and choose from your different **prompt examples**.

Afterwards, you can **share the loop component** with your colleague or team by sending the message.



Exercise 9: Access Copilot in Loop via Teams

Let‘s practice together!

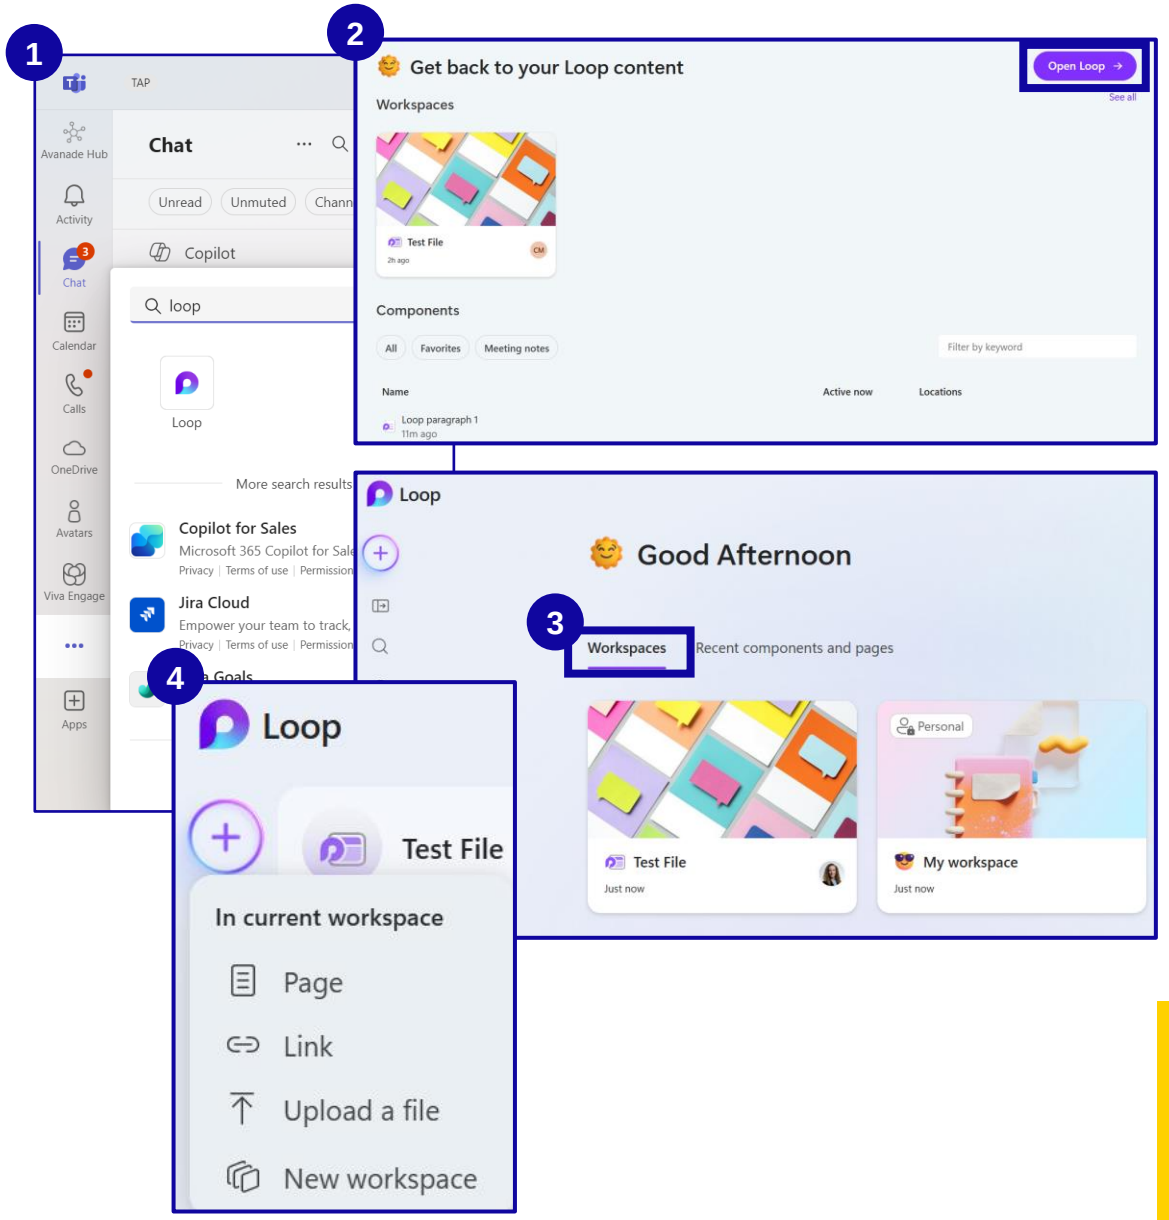
Loop | Access

1. Open your **Teams application** and check for **the Loop app**. Click on the three dots and search for Loop if you cannot find it.

2. Open **Loop via the Web browser** by clicking on “Open Loop”. The direct link to Loop in the Web browser is: https://loop.cloud.microsoft/

3. Create a **new workspace** if you did not use Loop before.

4. In your new workspace, you can **create a new page** by clicking on the plus icon.



Exercise 10: Reusing pages and templates

Let‘s practice together!

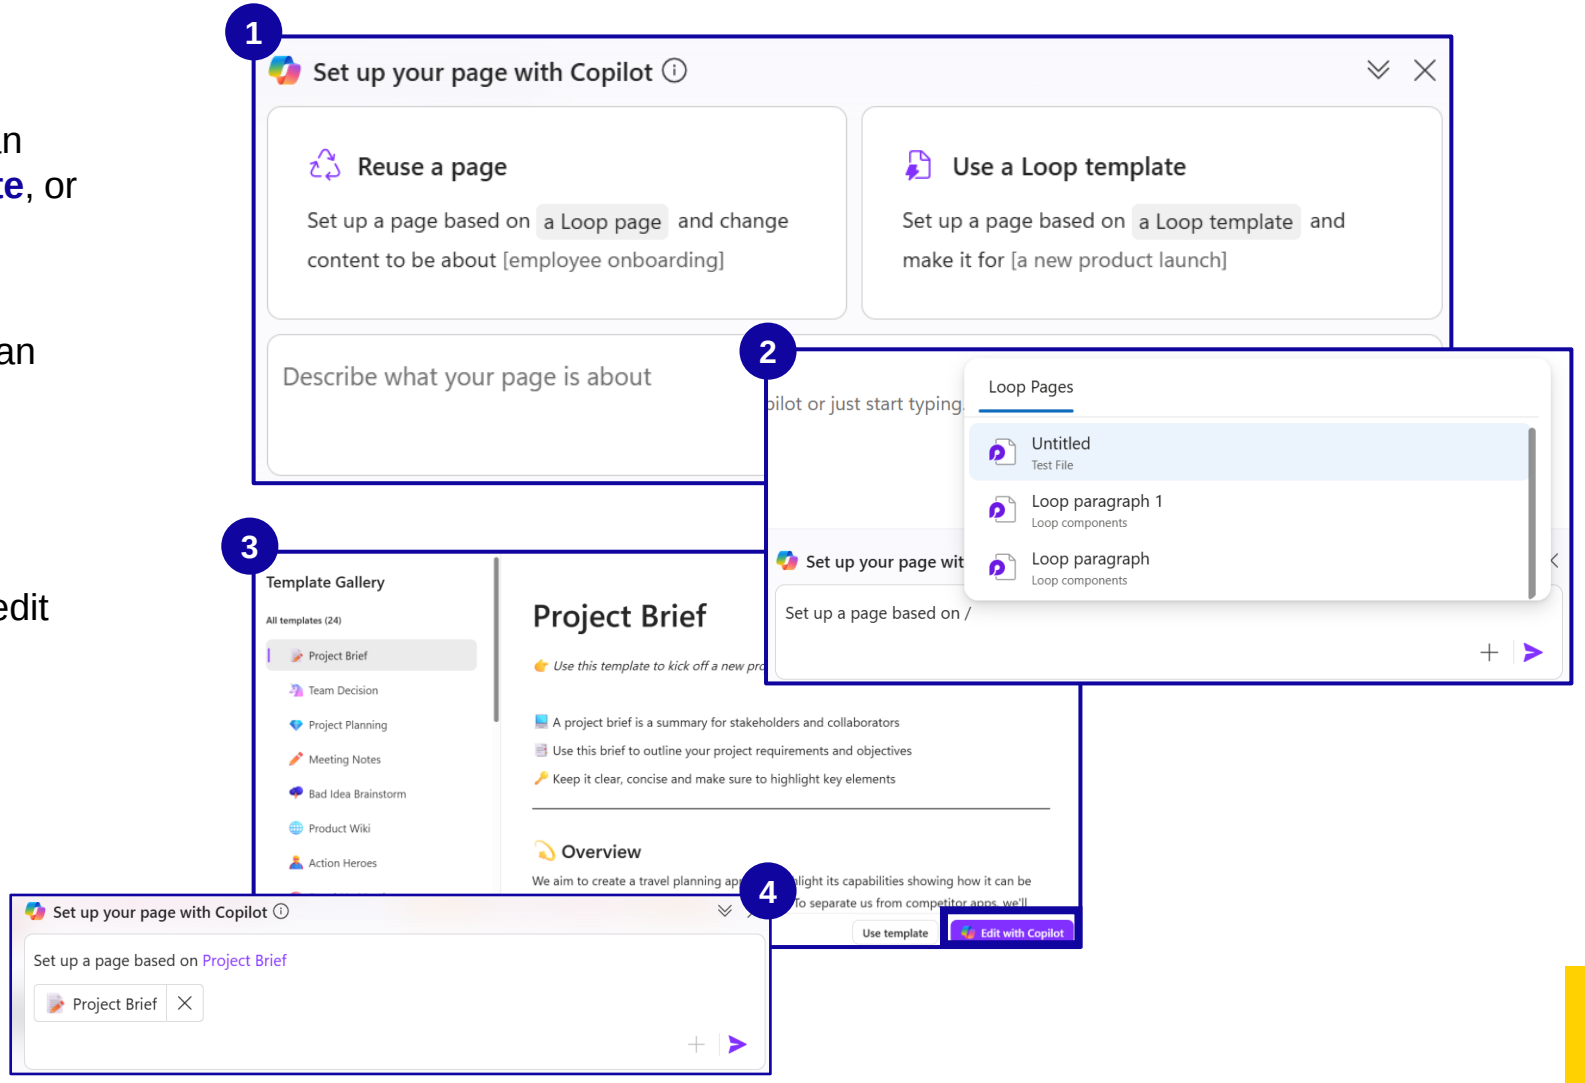
Loop | Access

1. When creating a new page, you can **reuse a page**, **use a loop template**, or **describe the loop** with Copilot.

2. To **reuse a page**, you can refer to an existing loop page and adjust your prompt.

3. To **use a loop template**, you can choose from many templates and edit the template with Copilot.

4. You can **enter any prompt for adjusting the template.**



Digital

6. Challenge 2

Let’s practice!

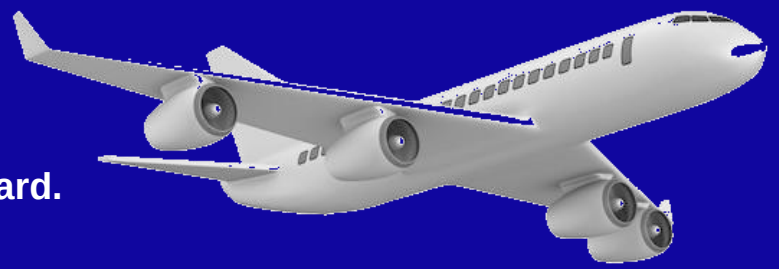
ASML

Challenge 2: Generate ideas with Whiteboard!

Continue your learning journey!

Challenge | Challenge 2

1. **Open** your Whiteboard via WebApp (or Teams).



2. **Look** for and click the **Copilot button** which is in **the bottom bar in Whiteboard.**

3. **Use Copilot** to **generate** ideas for a new project or topic to **brainstorm** on with your team.
You can use the following prompt: ***Generate 5 ideas for improving our team collaboration.***

RESULT

Please, share your output as a reply to the Challenge 2 related Viva Engage post.

- The final prompt you used
- The answer Copilot provided
- Check the reliability of the response

Next step

After that, once generated, you can organize these ideas with your team. Participants can drag and drop them into different categories or themes on the Whiteboard.
