2. Copilot Essentials

Let’s get started!

2.1 Introduction to M356 Copilot

2.2 Access, data privacy and responsible use of AI

ASML

Your M365 Copilot Access Steps

Follow these three steps to activate your license

Activate your license

1

Sign the Acceptable Use Policy to activate your Copilot license:

License Activation Link

Activation process

2

After signing the policy, it takes **2-4 days for your Copilot license to be activated**.

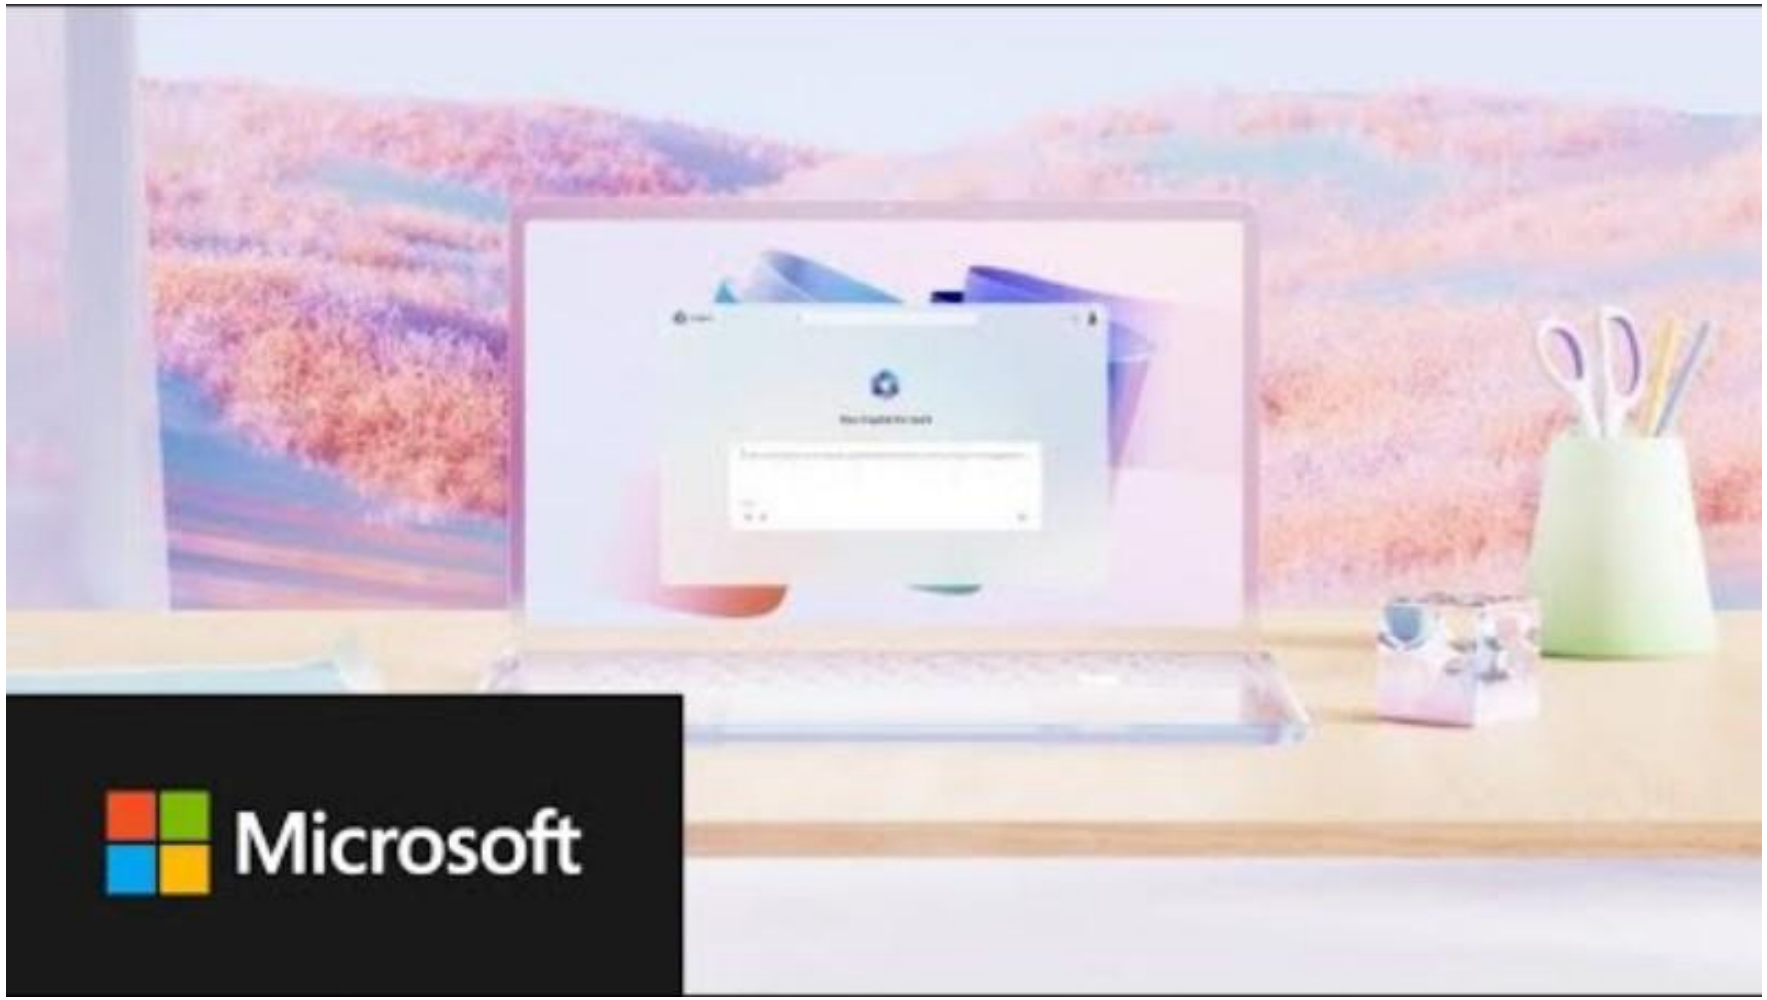
Support

3

If your Copilot license is not active after 4 days, **please reach out the technical support team**: copilot@asml.com

Meet M365 Copilot

Your everyday AI companion



Introducing Microsoft 365 Copilot | Your Copilot for Work

What is M365 Copilot?

Microsoft 365 Copilot

Embedded across all M365 applications

Teams
Outlook
Word
Excel
PowerPoint
Whiteboard
Loop
OneNote

Access to your business content and context

calendar, emails, chats, documents, meetings, and contacts

Built on Microsoft's comprehensive approach

Security
Privacy
Compliance
Responsible AI

What value does Copilot bring?

An overview

Efficiency

Be **more efficient** with M365 Copilot. Complete your tasks, to dos and projects **faster and easier.**

Effectiveness

M365 Copilot brings you **higher effectiveness**. Improve the **quality and clarity of your work** with smart suggestions and corrections.

Experience

With M365 Copilot, you can **enhance your collaboration and communication** with colleagues and customers through engaging support.

Core features that M365 Copilot provides

Designed to transform how employees work in the digital age

Enhanced meeting engagement

- Stay more engaged
- Get quick catch-ups for meetings you have missed
- Always stay in the loop

Efficient email management and writing assistance

- Streamline your email communication by summarizing lengthy email threads
- Draft responses
- Transform your writing by drafting, editing, summarizing, and creating

Presentation development

- Simply start presentations from scratch
- Either begin with a prompt or an outline using natural language commands
- Bring your ideas to life

Data analysis and visualization

- Identify trends, create visualizations, and provide recommendations
- Simplify your data analysis

User control

- Maintain control over AI suggestions
- Ensure that the human element remains at the forefront of AI interaction

Security and compliance

- Your data remains protected with comprehensive enterprise compliance and security controls

Example: Preparing for a Project Status Meeting

Without Copilot

Getting ready for a Project Status meeting sometimes takes up to **16 hours…**

Manual Content Preparation

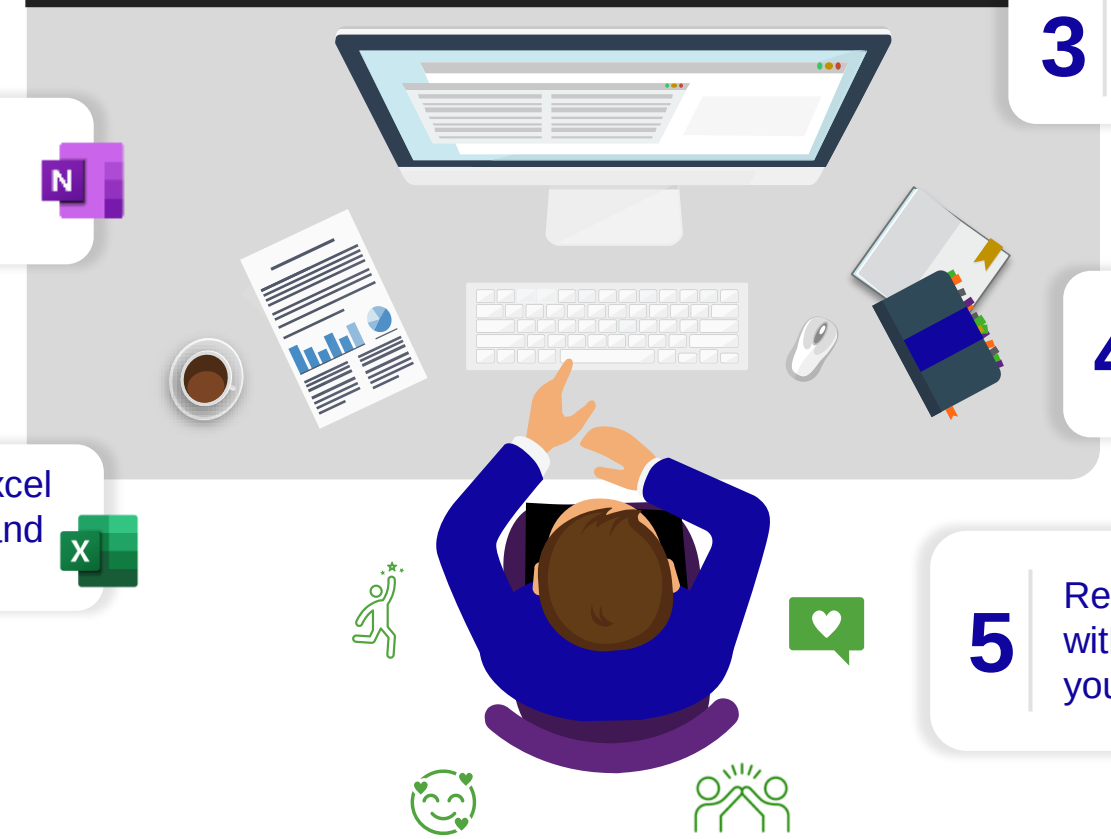
1. Review personal meeting notes in OneNote
2. Export and manually analyze project data from Excel
3. Manually create structure of tables in Excel
4. Manually create the project status report in Word
5. Manually create the PowerPoint presentation
6. Write speaker notes for the status report in PowerPoint slides

Example: Preparing for a Project Status Meeting

With Copilot

…but with Copilot you can reduce the time you need to spend to **3 hours!**

Preparation with Copilot



1. Structure notes with Copilot in OneNote
2. Use Copilot in Excel to find key data and insights
3. Let Copilot write a first draft of the project report in Word
4. Ask Copilot to draft a PowerPoint presentation from the Word file
5. Refine speaker notes with Copilot based on your knowledge

Digital
Transformation
Engine

2. Copilot Essentials

Let’s get started!

2.1 Introduction to M356 Copilot

2.2 Access, data privacy and responsible use of AI

ASML

How does M365 Copilot work?

M365 Copilot accesses the same data you can access with your Microsoft 365 account today

If you notice Copilot has access to information that should be labelled as top secret, company secret or has content of personally identifiable Information, please raise a concern to the GenAI security team.

Powered by:
Azure AI's Large Language Model

Responsible use of AI

Powerful tools like M365 Copilot require considerable accountability

Follow the Mandatory training: ASML DeCode - Responsible AI to ensure that you are using AI tools responsibly.

Information access control

- Verify settings of Teams and SharePoint sites in which you are an owner according to your needs.
- Avoid the publication of sensitive content generated by Copilot that should not be available to the public.

Mind your data

- Use and maintain sensitivity labels on all content by pro-actively (re)labeling.
- For usage of Copilot with client content, always check with your project or IT team.

Be responsible

- Use GenAI with ethics and responsibility as you would with any other tools.
- Responsibility lies within you, so be mindful not to put anyone at risks.
- Mention your usage of M365 Copilot to team members (e.g., when transcribing a meeting).

Output checking

- Review all generated output and ensure that the sources used are correct.
- Remove biased, proprietary, or confidential information.
- Prevent hallucinations by using the right prompt and asking for sources.

Note: Please read through the ASML's Generative AI Policy and this article Generative AI at ASML: embracing innovation responsibly to ensure that you are compliant and using Copilot and any other AI tools available responsibly.

Digital
Transformation
Engine

3. Prompting

The key skill for M365 Copilot

3.1 The Art of Prompting

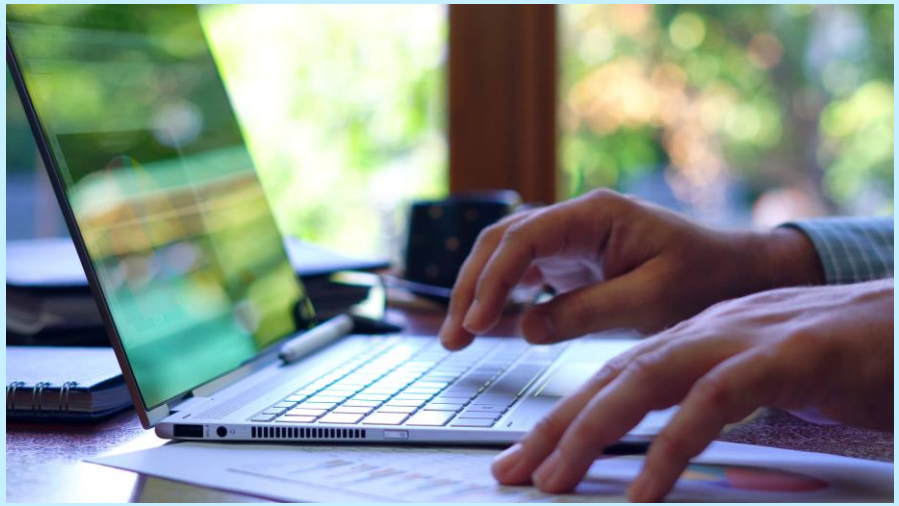
3.2 Hallucinations

ASML

We want to know from you…

Write your answer in the chat:

Share a prompt that you used today.



What is prompting?

The key skills to unlock the power of M365 Copilot

What is prompting?

Inputting a **query** into a generative AI tool. The prompt serves as a guide, **instructing** the AI on the type of information or content you want it to generate.

"Learn"

You want Copilot to teach you about a new topic that is unfamiliar to you

"Transform"

You want Copilot to change the format of a deliverable so you can make it consumable for your leadership team

"Create"

You want Copilot to write something new for you such as a slogan, strategy, outline, communication, story.

"Edit"

You want Copilot to improve the quality or readability of a text such as grammar, spelling, punctuation, etc.

"Summarize"

You want Copilot to condense a long text into shorter one, such as a summary, abstract, a headline, etc.

"Analyze"

You want Copilot to provide information or insight, such as keywords, topics, sentiment, business-related data set, etc.

Why do quality prompts matter?

The higher the quality of your input, the higher the quality of your output

Escape from hallucinations

Generative AI can create results and answers that seem compelling but are entirely made up and not real.

Precision: A **detailed** and precise prompt enables an output that provides value and meets your objectives

Efficiency: A **well-structured** prompt saves time, generates complex content and reduces the need for iterative prompting

Versatility: Variations in prompts generate different outputs and using the right prompt for each **scenario** results in improved output alignment to objectives

The ingredients of a good prompt

To get the best response, it is important to focus on some key elements when phrasing your Copilot prompts

Goal	+	Context	+	Expectations	+	Source
What do you want from Copilot?		**Why do you need it and who is involved?**		**How should Copilot respond to best fulfil your request?**		**What information or samples do you want Copilot to use?**
"I want a list of 3-5 bullet points to prepare me…"		*"… for an upcoming meeting with [Name], focusing on their current state and what they're looking to achieve."*		*"Respond with a tone that is friendly but authoritative…"*		*"… and focus on email and Teams chat with [Name] over the last two weeks."*

Moving from a generic to a comprehensive prompt

Good, better, and best prompt example

Good prompt:

"Draft an email about our new Contoso 3D printers."

Better prompt:

"Draft an email introducing our new Contoso 3D printers to our customers."

Best prompt:

"Draft an email detailing our new Contoso 3D printer features, launching next week to our customers. Include a link to the product page. Use the attached Word file as a background information about the printer."

Goal
What do you want from Copilot?

+

Context
Why do you need it and who is involved?

+

Expectations
How should Copilot respond to best fulfil your request?

+

Source
What information or samples do you want Copilot to use?

Exercise 1: The Art of Prompting

Prompt used:

Provide me with a three-day itinerary for my upcoming trip to Singapore.

Goal
What do you want from Copilot?

+

Context
Why do you need it and who is involved?

+

Expectations
How should Copilot respond to best fulfil your request?

+

Source
What information or samples do you want Copilot to use?

Write your answer in the chat:

What is missing in this prompt?

Goal, Context, Expectations or Source?

Sure, I'd be happy to help you plan your trip to Singapore! Here's a suggested three-day itinerary:

Day 1: Exploring Marina Bay and Surroundings

Morning:

- Start your day at **Marina Bay**. Visit the iconic **Marina Bay Sands** and take in the stunning views from the SkyPark.
- Walk over to the **Merlion Park** to see the famous Merlion statue.

Afternoon:

- Head to the **Gardens by the Bay**. Explore the Flower Dome and Cloud Forest, and don't miss the Supertree Grove.

Evening:

- Enjoy dinner at **Clarke Quay**, a vibrant riverside area with plenty of dining options and nightlife.

Day 2: Sentosa Island and Beach Time

Morning:

- Take a cable car from **Mount Faber Park** to **Sentosa Island**.
- Visit attractions like **Universal Studios Singapore** or the **S.E.A. Aquarium**.

Afternoon:

- Relax on one of Sentosa's beautiful beaches, such as **Siloso Beach** or **Palawan Beach**.

Evening:

- Head back to the mainland and explore the bustling **Chinatown** for dinner and shopping.

Day 3: Cultural and Historical Exploration

Morning:

- Start your day in **Little India**. Visit the **Sri Veeramakaliamman Temple** and explore the vibrant streets.

Afternoon:

- Head to **Kampong Glam**. Visit the **Sultan Mosque** and explore the trendy Haji Lane.

Evening:

- End your trip with a visit to **Orchard Road** for some shopping and dining.

This itinerary covers a mix of iconic landmarks, cultural experiences, and relaxation time. Enjoy your trip to Singapore! If you have any specific interests or preferences, let me know, and I can tailor the itinerary further.

Edit in Pages | Copy | 1 of 30 responses | AI-generated content may be incorrect

Exercise 1: Better example of the prompt!

Better prompt:

Provide me with a three-day itinerary for my upcoming trip to Singapore. The trip is together with my family for vacation.

It should include a variety of activities, such as going to the National Museum and going on the Night Safari. Besides this, include a visit to Merlion.

Format your output as a table.

Use the website https://www.tripadvisor.nl/Attractions-g294265-Activities-c47-Singapore.html as a source.

Goal
What do you want from Copilot?

+

Context
Why do you need it and who is involved?

+

Expectations
How should Copilot respond to best fulfil your request?

+

Source
What information or samples do you want Copilot to use?

Here's a three-day itinerary for your family vacation in Singapore, including a variety of activities and a visit to the National Museum, Night Safari, and Merlion:

Day	Morning	Afternoon	Evening
Day 1	Visit the **National Museum of Singapore** to learn about the country's history and culture.	Explore **Marina Bay** and visit the iconic **Merlion** statue.	Head to **Lau Pa Sat** hawker center for dinner, known for its satay and local delights.
Day 2	Take a cable car to **Sentosa Island** and visit **Universal Studios Singapore** or the **S.E.A. Aquarium**.	Relax on **Siloso Beach** or **Palawan Beach**.	Enjoy dinner at **Maxwell Food Centre**, famous for its chicken rice and other local dishes.
Day 3	Start your day in **Little India** and visit the **Sri Veeramakaliamman Temple**.	Head to **Kampong Glam** and explore the **Sultan Mosque** and trendy Haji Lane.	Experience the **Night Safari** at the Singapore Zoo, and have dinner at **Newton Food Centre**, known for its seafood and local fare.

This itinerary covers a mix of cultural experiences, iconic landmarks, and relaxation time. Enjoy your trip to Singapore! If you have any specific interests or preferences, let me know, and I can tailor the itinerary further. [1] [2] [3]

Edit in Pages | Copy | 3 of 30 responses | AI-generated content may be incorrect

Prompting bonus tips!

Keep in mind the following recommendations

Start fresh. Type “new chat” to start each unrelated task in the cross-app chat.

Clear grammar. Correct grammar to avoid ambiguous phrasing.

Use quotes. To generate exact written, modified or replaced content.

Use direct linking. By using file and people shortcuts, you speed up and improve the output.

Be selective. Don’t use Copilot as a simple search engine.

Have a plan B. Provide Copilot with alternative paths if it cannot complete your request.

Do you need more prompt suggestions?

Check out Microsoft‘s prompt gallery!

You can filter prompts via application, task, job type, and Copilot agent!

Check out Microsoft‘s prompt gallery!

3. Prompting

The key skill for M365 Copilot

3.1 The Art of Prompting

3.2 Hallucinations

ASML

What are hallucinations?

Be aware!

Hallucinations occur when Copilot makes statements that **sound believable and true but are incorrect**. These can also occur when you keep asking Copilot the same prompt or slightly different prompts over and over again.

How can you prevent this?

- ✓ Ask for references
- ✓ Use the right prompt
- ✓ Direct Copilot towards the correct information

Exercise 2: Example of hallucinations

ASML as the ever first semiconductor manufacturer

Prompting | Hallucinations

Write twenty words about ASML being the ever first manufacturer in the world for the semiconductor industry.

Copilot

ASML pioneered the semiconductor industry as the first manufacturer of advanced photolithography systems, revolutionizing chip production and technological progress worldwide.

In Pages bearbeiten | Kopieren | KI-generierte Inhalte können fehlerhaft sein

Copilot's answer makes sense and seems to be true, but on closer inspection Copilot made an assumption on our prompt.

Can you provide me sources for ASML being the ever first manufacturer?

Copilot

ASML was founded in 1984 as a joint venture between Philips and Advanced Semiconductor Materials International (ASMI) to develop photolithography systems for the semiconductor industry [1] [2]. However, ASML is not the first manufacturer in the semiconductor industry. Companies like Intel and Texas Instruments were already established in the semiconductor field before ASML's inception [2].

If you have any other questions or need further information, feel free to ask!

1 Our history | ASML - Supp... | 2 ASML Holding - Wikipedia | ASML's founding story: ou... | Mehr anzeigen

In Pages bearbeiten | Kopieren | KI-generierte Inhalte können fehlerhaft sein

When asking Copilot for reliable sources that support the answer, Copilot corrects itself. A classic example of a hallucination!

M365 applications Zoom In

M365 Copilot Chat, Teams and Outlook

In the next chapters, we will focus on:

M365 Copilot Chat

Outlook

Teams

4.3 Prompting

ASML

M365 Copilot Chat

Overview

Copilot supports you in your **daily work in various chats** with coworkers, in meetings, calendar and as a dedicated chat function known as M365 Copilot Chat.

The main benefits of M365 Copilot Chat are:

Enhanced Productivity

24/7 Availability

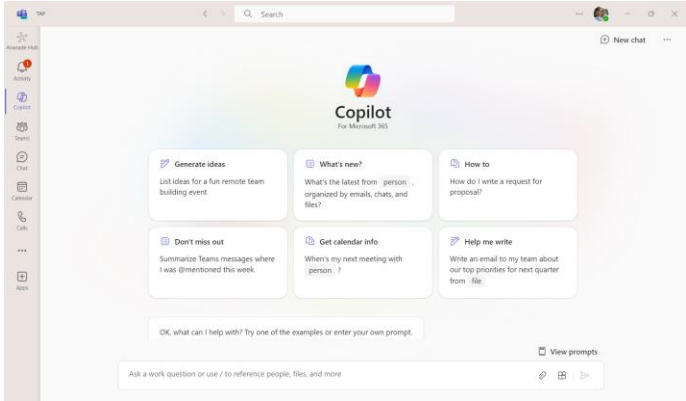
Personalized Assistance

How can M365 Copilot Chat help me?

- Look for existing information to prepare for meetings
- Summarize emails, meetings, chats, files, and more
- Find relevant information, sites, and content
- Searching in OneDrive (Work mode) or searching with the internet access (Web mode)

It is your data

- The content generated is based on the data you currently have access to
- Allows you to query a variety of items and scans all the data you have access to within ASML
- Maintain your data and act responsibly



Using a source in M365 Copilot Chat

Use case

Include a source

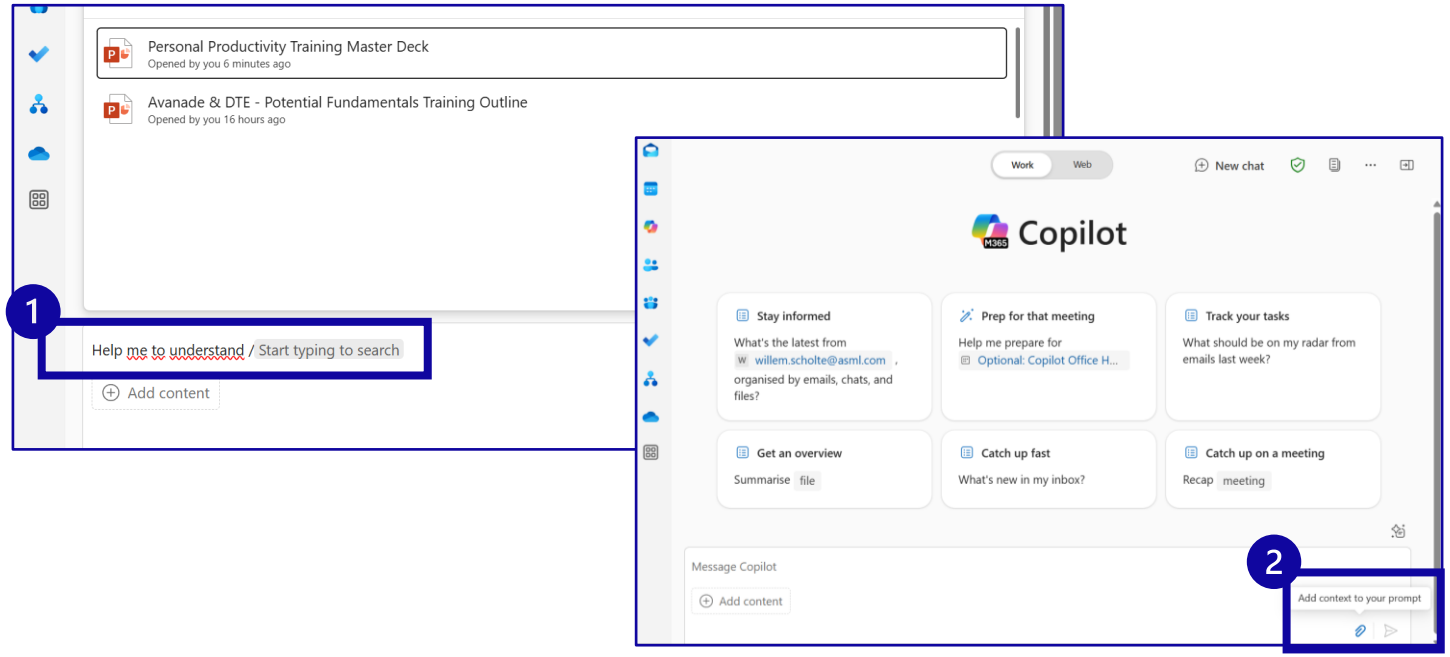
You can reference files in your prompt. By providing Copilot with more context, your output will be better.

Two ways to include a source:

1) Use a / in your prompt to paste a link to the file

OR

2) Click on the paperclip to add a file



Goal
What do you want from Copilot?

+

Context
Why do you need it and who is involved?

+

Expectations
How should Copilot respond to best fulfil your request?

+

Source
What information or samples do you want Copilot to use?

Languages in M365 Copilot Chat

Use case

Copilot support in more languages

Microsoft is adding support for an additional 17 languages, further expanding access to Copilot worldwide.

Prompts and responses can be generated in the following languages:

Portuguese, German, French, Chinese (simplified), Japanese, Italian, English, Spanish

Over March and April 2025, they started to roll out the following additional languages:

Arabic, Chinese Traditional, Czech, Danish, Dutch, Finnish, Hebrew, Hungarian, Korean, Norwegian, Polish, Portuguese (Portugal), Russian, Swedish, Thai, Turkish and Ukrainian

Two ways how to use languages in M365 Copilot Chat:

1) **Use the language name as a prompt for Copilot to switch to this language**
2) **Formulate the prompt directly in the preferred language**

4.3 Prompting

ASML

Prompting in M365 Copilot Chat

Try out the following useful prompts!

M365 Copilot Chat | Prompting

Catch up with your day

Summarize my recent emails; Summarize my recent emails from [name].

Summarize my last interaction with [name].

When is my next meeting with [name]?

Keep track of your colleagues

What's the latest from [person]; What has [name] been working on?

Identify all connections with [name] between [time frame].

What is the status of [reference file or name of project or task]

Prepare your day

Help me prepare for my day. What has [name] been working on?; What have I been working on?

Summarize my mails, Teams messages and channel messages from the last [workday/Week]. List action items in a dedicated column. Suggest follow-ups, if possible, in a dedicated column. The table should look like this:
Type (Mail/Teams/Channel) | Topic | Summarization | Action item | Follow-up.
If I have been directly mentioned, make the font of the topic bold.

Prompting in M365 Copilot Chat

Try out the following useful prompts!

M365 Copilot Chat | Prompting

Manage files

Find me the latest [file, deck, etc.] on [topic]

Find all documents available to me about [subject]

When is my next meeting with [name]?

What guidelines do we have at <CLIENT NAME> to manage [topic]

Find information

What's the latest from [person]; What has [name] been working on?

List all decisions that are mentioned in meeting notes with the name [title meeting minutes] between [date] and [date]

How do I classify / [document name]?

I want to know more about [topic].

Can you give me a list of [Groups] **which I share with** [Person name]

Get meeting insights

Tell me about the meetings I have scheduled for [date]. Limit your answer to 5 items.

Do I have schedule conflicts on [date]?

Make an overview of the presence and absence of people from the meeting with the name [name] from [date] till [date]

Prompting in M365 Copilot Chat

Try out the following useful prompts!

Explain

Artificial intelligence (or any other concept) can be a hard concept to grasp when you are not working with it every day. Copilot can help you to answer all the questions you have.

Explain to me how Copilot works and what data it uses. Explain it to me like I am an 8-year-old child.

As an expert in [topic], **your task is to provide me with a simple, easy-to-understand summary** of what [role] does in a [setting]. Imagine you are explaining this to my 90-year-old grandmother, who has no prior knowledge of [industry/product].
Focus on the [role's] key responsibilities, such as ensuring [examples]. Use plain language and relatable analogies to make the concepts clear and engaging. For example, you could compare [example 1] to [example 2], with the [role name] acting as [role]. Aim for a concise summary, around 150 words, that captures the essence of the [role name]'s role in a way that is both informative and accessible.

Create documents

Collaborating with teams that do not speak your native language? Make communication easier with the Copilot translation feature in chat. Use this prompt:

Translate [text] **to** [language].

Be creative

Asking the right questions during a call can be hard, so a playbook can help. Copilot can aid you creating a playbook for these occasions.

Create a playbook for a [meeting/phone call] with [person/group] in which I want to achieve [specify objective as clear as possible]
suggesting key elements I can follow in the conversation.

It's hard to start a brainstorm with a clean slate, so just ask Copilot to provide you with a mind map to kickstart your brainstorming session!

Create a mind map about [topic]. Format it in markdown.

Exercise 4: Saving prompts in M365 Copilot Chat!

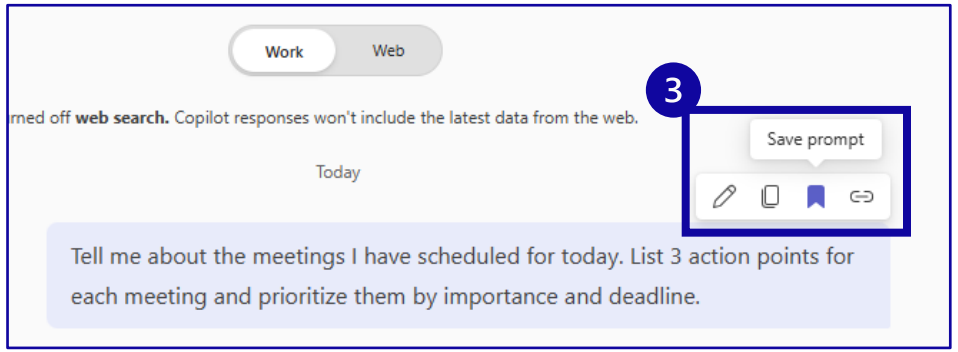
Try out the following use case

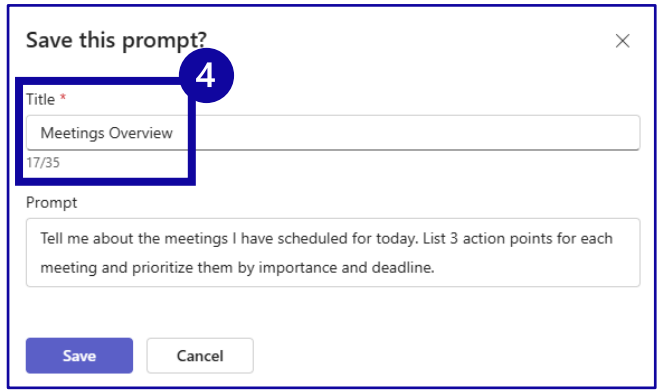
M365 Copilot Chat | Prompting

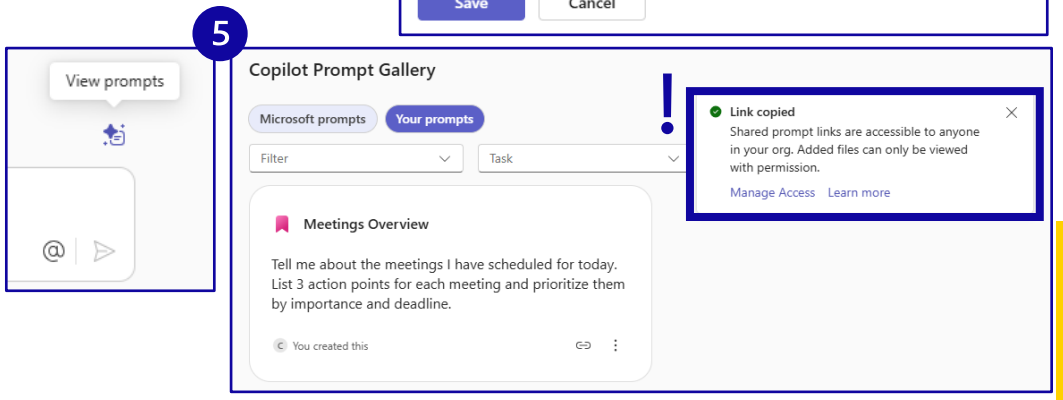
1. Open **M365 Copilot chat** via your Teams application.
2. Try out the following prompt: ***Tell me about the meetings I have scheduled for today. List 3 action points for each meeting and prioritize them by importance and deadline.***
3. As a next step, **save your prompt by clicking on the flag above the prompt.**
4. **Save the prompt** by giving it a title.
5. When starting a new chat, you will find your saved prompts via **"View prompts"** and in the menu **"Your prompts".**
6. **Share your feedback or comments in the chat!**

! **Bonus tip:**

You can also share your saved prompts with colleagues!







Small break ☺

Half-way through!

Grab water, coffee, or tea.

Ask your questions by putting them in the Q&A chat.

Copilot in Outlook

Overview

Copilot in Outlook helps users **draft emails, refine tone and clarity, summarize lengthy email threads, and streamline inbox management** to boost productivity.

The main benefits of Copilot in Outlook are:

Efficient Working

Improved Communication

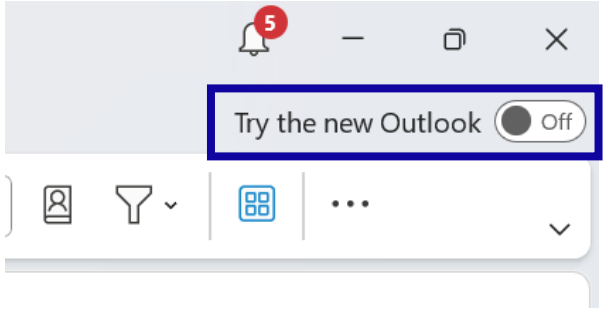
Personalized Support

How can Copilot in Outlook help me?

- Summarize and extract key points from long mail threads
- Generate full-length email drafts
- Get feedback provided on your email drafts, suggesting improvements
- Schedule meetings based on your calendar (only in New Outlook)

New vs. Classic Outlook

- M365 Copilot for Outlook is only available via the desktop application when using the "new" version of Outlook (both Outlook versions can be used next to each other)
- New features available in the New Outlook or Outlook in Browser



Digital
Transformation
Engine

5. Copilot in Outlook

Application Training

5.1 Benefits and use cases

5.2 Access

5.3 Prompting

ASML

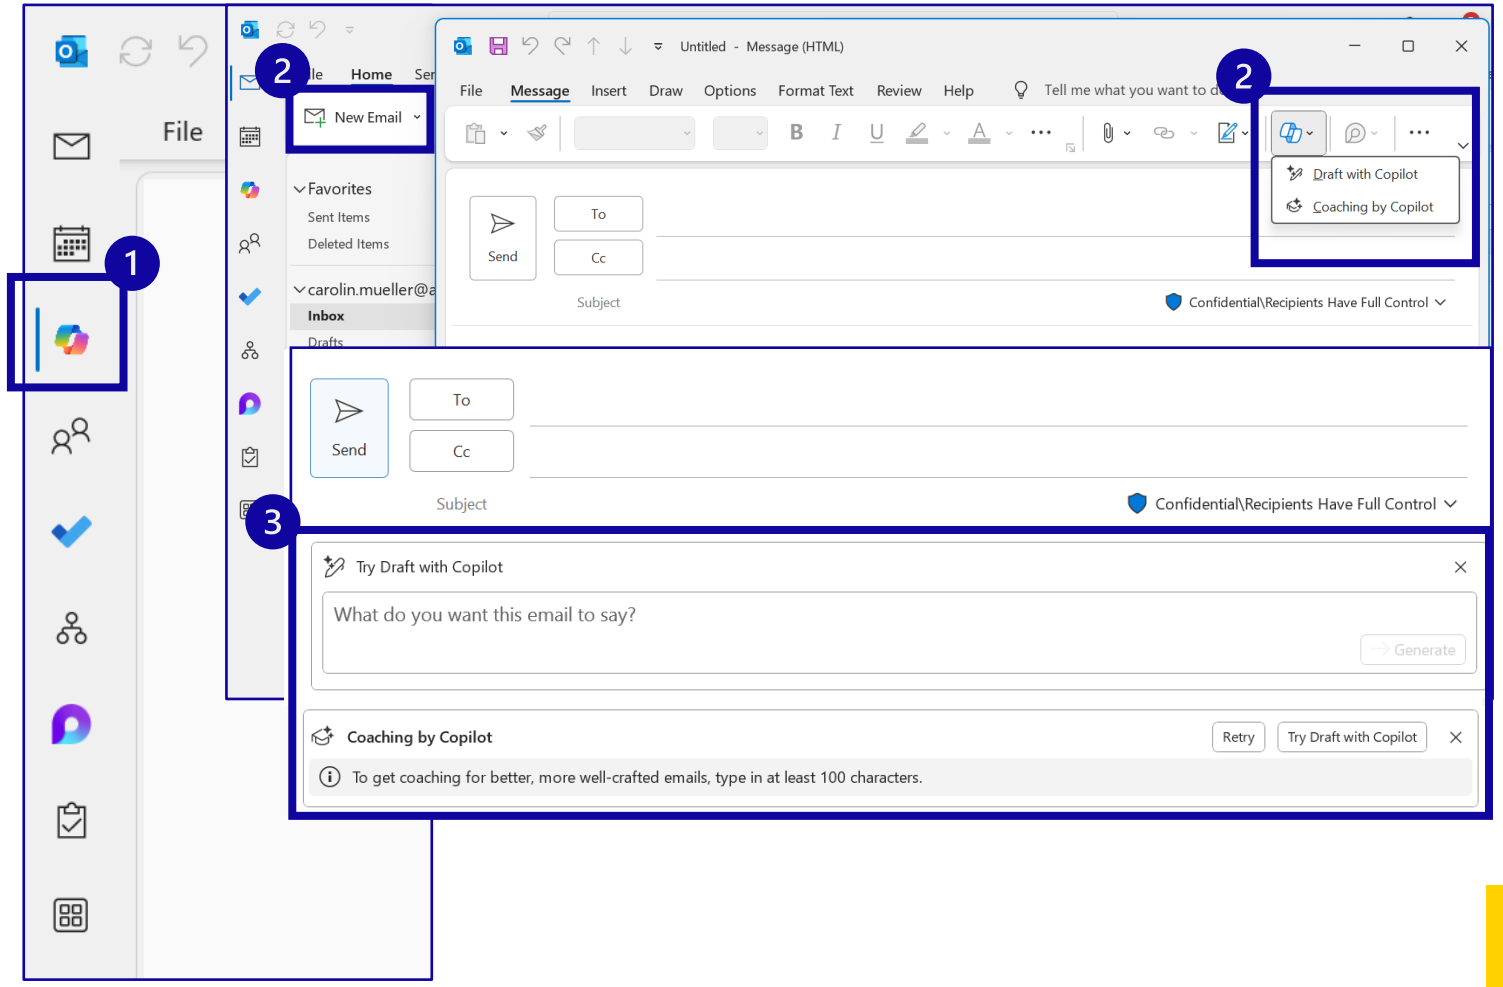
Exercise 5: Copilot in (classic) Outlook Access

Take your own turn!

Outlook | Access

We will access Copilot in the old Outlook.

1. On your left side in Outlook, you find the Copiot icon to open the M365 Copilot Chat.
2. Open a new mail and click on the Copilot icon on the top menu bar. It offers you to draft with Copilot or to coach with Copilot.
3. You can draft or coach with Copilot in the mail text field.

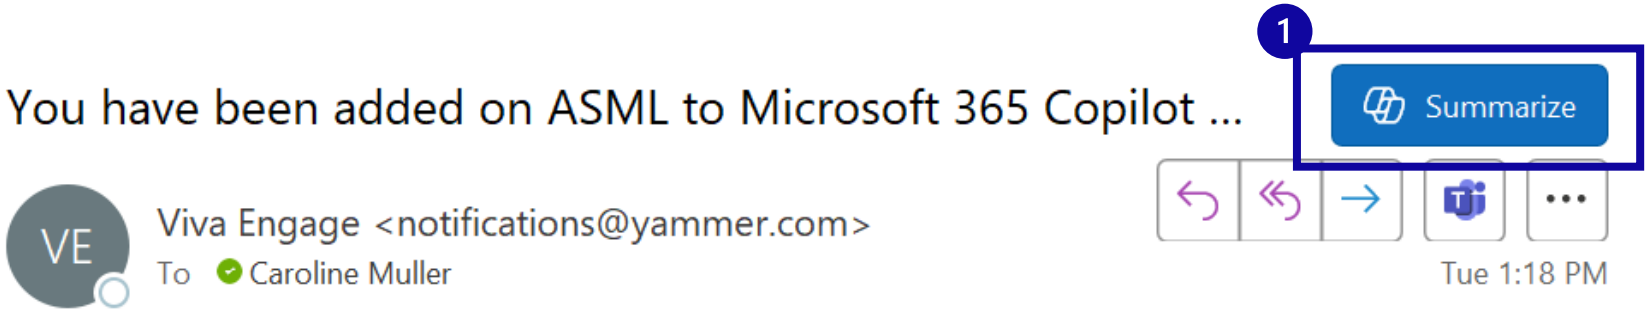


Summarizing Emails with Copilot in Outlook

Old and New Outlook

Outlook | Access

1 Click on Summary by Copilot on a long mail thread.



2 Copilot scans the mail thread and generates a summary.

3 With the copy summary option, you can copy the generated text for further usage.

Digital
Transformation
Engine

5. Copilot in Outlook

Application Training

5.1 Benefits and use cases

5.2 Access

5.3 Prompting

ASML

Prompting in Outlook

Try out the following useful prompts!

Outlook | Prompting

Write emails

Writers block? Copilot can help you with that! Simply use the *Draft with Copilot* functionality.

Write an email to a sick colleague:

Write a mail that wishes a sick employee a good recovery. Ask if certain help or hand-over actions is needed. Say something nice. Write the mail in English and use a friendly tone.

Use *Coaching by Copilot* to improve your writing

Get suggestions on how to effectively deliver sensitive information or coaching tips to improve email clarity and tone, you decide what to keep, modify, or discard.

Oversight into your emails

Copilot creates oversight into all your upcoming emails and provides you with a list of action items to streamline your workload. Use this prompt in the integrated Copilot chat in the New Outlook.

Summarize my emails with flag and prioritise them by importance. Create a table with the following columns: Date, Sender, Summary of the mail, Action items for me, Suggestions for follow-up.

Let Copilot summarize an entire email thread, so you don't have to spend time going through countless emails to find the action points

Click on the "Summary by Copilot" button at the top of an email or email string.

Summary by Copilot

Catch up with colleagues

With the new integrated Copilot functionality in Outlook, you can prompt Copilot even more and ask more context-dependent questions about your emails.

Summarize emails from [X].

Show me a summary of the [topic] from [sender] over the last [period}

Write a summary to my team lead as a continuous text in the form of a travel report with a business background and summarise the 3 most important points at the end, using the following notes /[reference file].

Exercise 6: Draft an email with Copilot!

Take your own turn!

Outlook | Prompting

1. Open your **Outlook application** and start a **new email**.

2. Navigate to **Drafting with Copilot** if it does not pop up automatically.

3. Let Copilot create a draft for you regarding the following topic (and save it as a draft for the next exercise!):
   As your vacation approaches, you need to send an email to a colleague who will be taking over your tasks.
   Please note that it is not the final prompt you need to use but only the topic to guide you.

4. **Share your prompt and the email draft in the chat!**

Do not forget the essential prompt ingredients:

Goal	+	Context	+	Expectations	+	Source
What do you want from Copilot?		Why do you need it and who is involved?		How should Copilot respond to best fulfil your request?		What information or samples do you want Copilot to use?

Bonus tip: Type „/“ in the email draft if Copilot does not start on its own.

Exercise 7: Coaching by Copilot!

Take your own turn!

Outlook | Prompting

1. Open the email you just wrote with Copilot about its opinion on Copilot.
2. Navigate to „Coaching by Copilot“ if it does not pop up automatically.
3. **Let Copilot coach you and share the suggestions in the chat!**

Copilot in Teams

Overview

Copilot can help you in Teams by **summarizing important documents, catching up on communications, generating drafts of emails, and providing insights from your enterprise data** to enhance collaboration and productivity.

The main benefits of Copilot in Teams are:

Enhanced Meeting Summaries

Action Item Tracking

Real-time Insights

10’

How can Copilot in Teams help me?

- Summarize key discussion points during meetings
- Track action items and identify follow-up questions
- Generate meeting notes and protocols
- Make use of post-meeting actions (when transcription is turned on)

Limitations

- Copilot is not able to query input from Teams channels.
- Cannot transcribe ad-hoc meetings, only meetings that are planned with a calendar invite and the owner of the event.
- When using Copilot during a meeting, it will utilize the transcript but will not store it. This means you can interact with Copilot only during the meeting. To interact with Copilot after the meetings ends, ensure you record and transcribe the meeting.

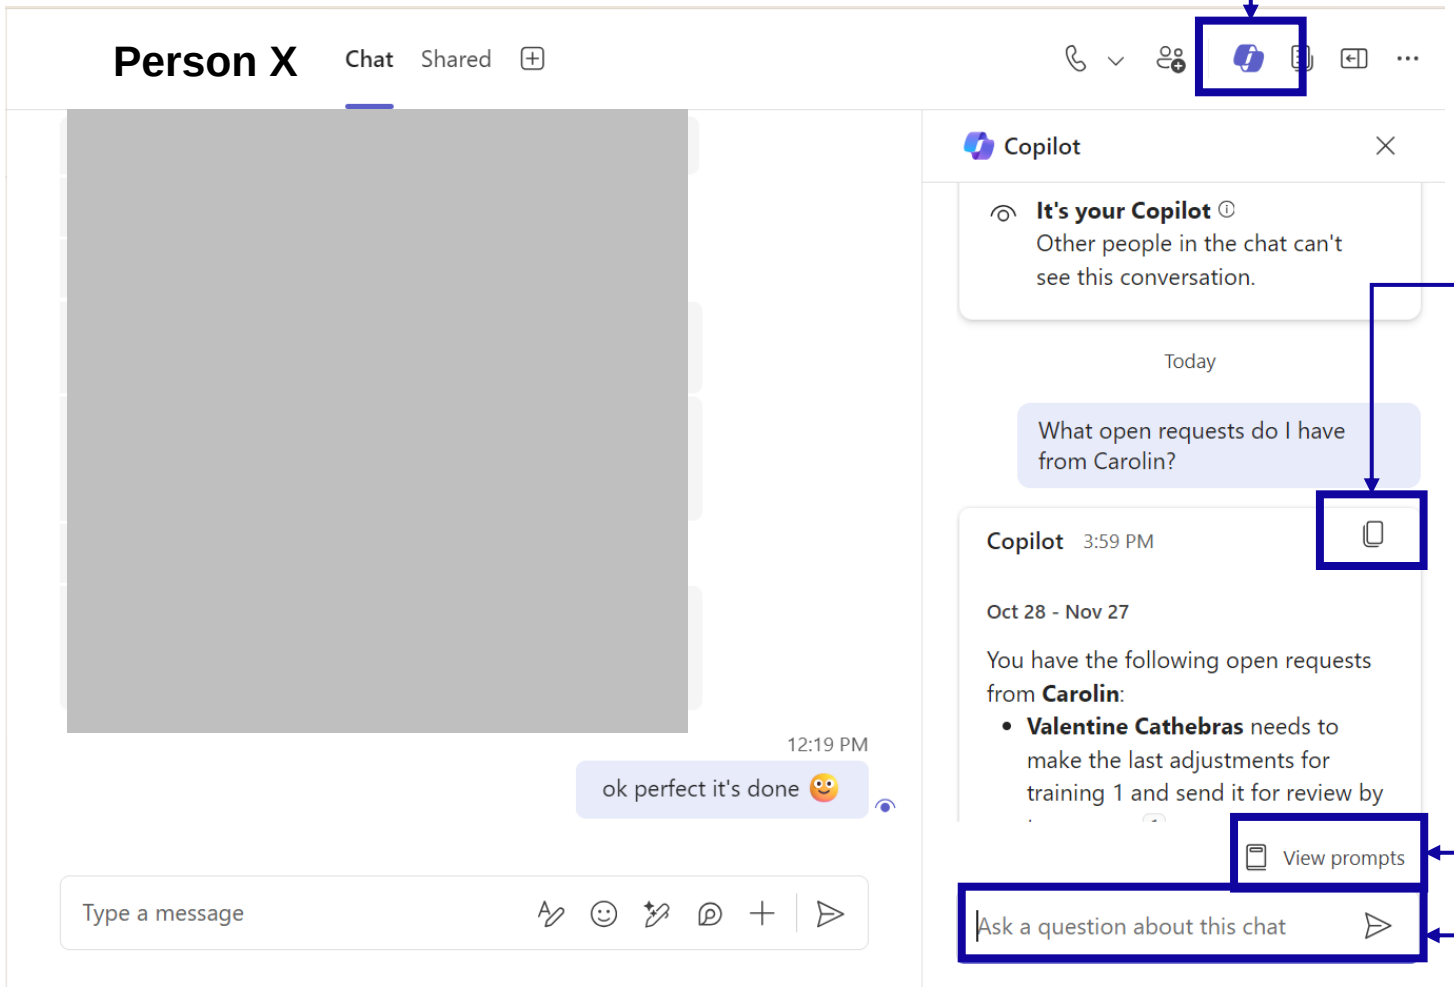
Exercise 8: Copilot in Teams Access

Take your own turn!

Teams | Access



Activate Copilot

To activate Copilot, select the Copilot icon from the top right side of the menu in a one-to-one, group, or meeting chat

Copy Content

Select the copy icon if you want to share Copilot's output with others

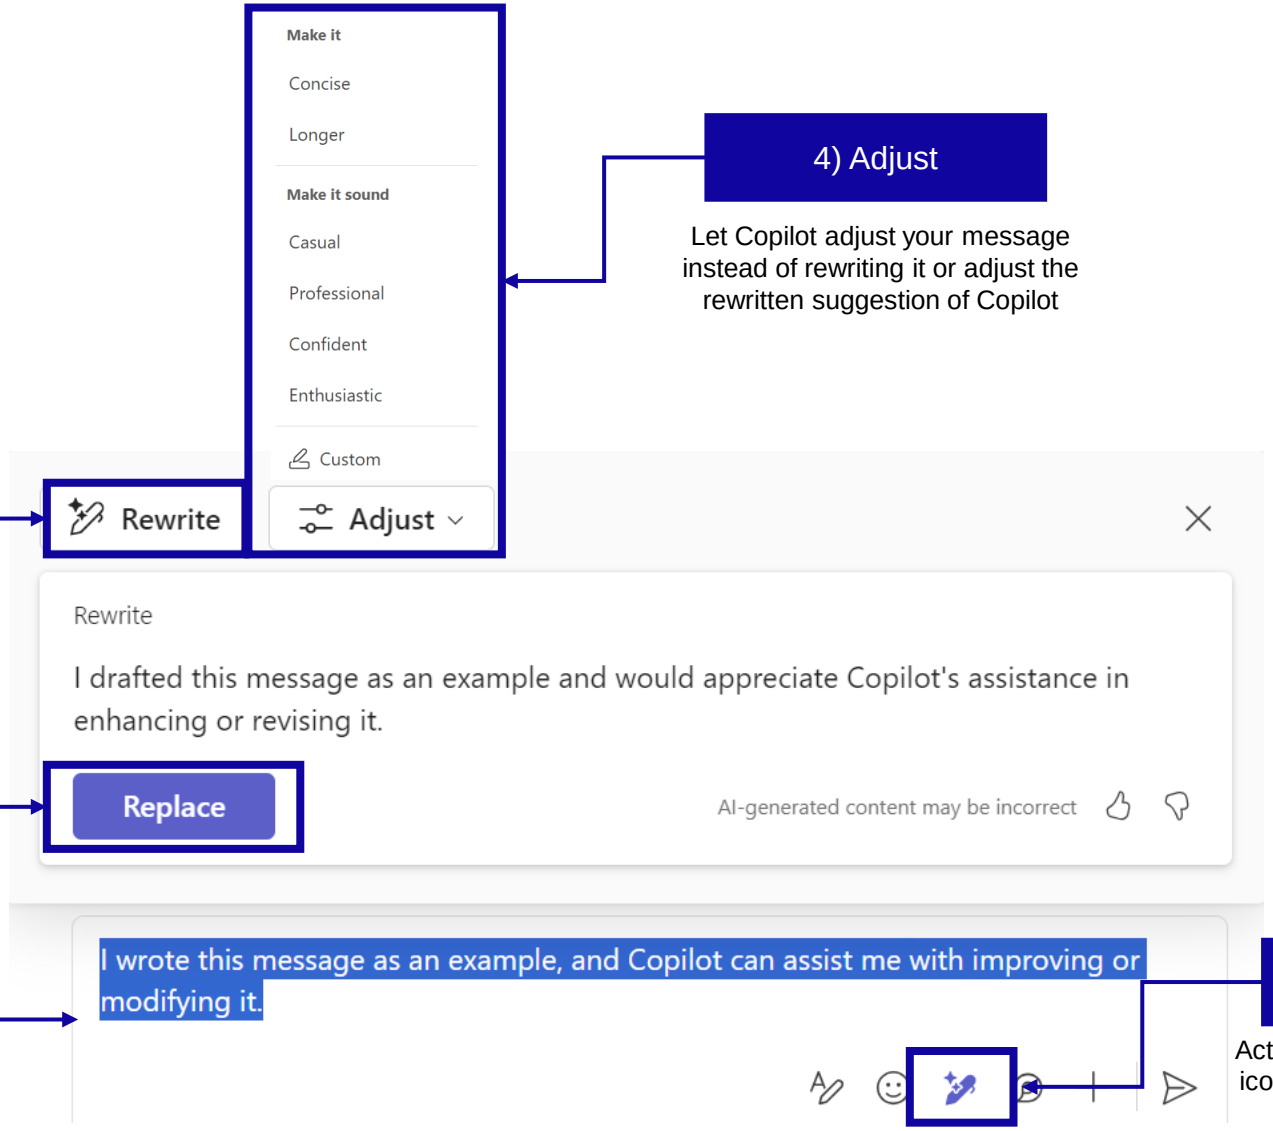
Ask Copilot

View prompts

Exercise 9: Copilot in Teams Access

Take your own turn!

Teams | Access



3) Rewrite

You can ask Copilot to rewrite the initial message

4) Adjust

Let Copilot adjust your message instead of rewriting it or adjust the rewritten suggestion of Copilot

4) Replace

Click on Replace if you want to let your initial message be replaced with the suggestion of Copilot

1) Start with a message

Type a message you would like to send

2) Activate Copilot

Activate Copilot by clicking on the icon with the pen in the message

Prompting in Teams

Try out the following useful prompts!

Teams | Prompting

Catch up

Summarize Teams messages where I have been @mentioned this week

Recap the topic of [XZY] in this chat**.**

Are there any action items for me?

Did the team **achieve consensus** on a decision and what was it?

Understand and prepare your tasks

Summarize this busy group chat **to keep track** of what's talked about.

Create a detailed recap from the discussion with [person] about [specific issue], including customer quotes and an outline of action items to address moving forward

Run this on Friday for a **quick check of what's coming on Monday to avoid surprises and see how much preparation** might be needed

Design and create with colleagues

Create a workback schedule based on the deadlines we discussed.

Help us brainstorm some ideas for our next steps on this project

Help us brainstorm some ideas for our next steps on this project

Create a table style to do list with summarized chats, emails and tasks [person] and me were discussing in this chat.

Exercise 10: Recap with your colleague!

Take your own turn!

Teams | Prompting

1. Open a chat with a single colleague and open Copilot on the right side of the chat.
2. Use the following prompt: ***Create a detailed recap from the discussion with [person] about [specific topic], including action items and deadlines for both of us.***
3. **Check the reliability of the answer and share feedback in the chat!**

7. Challenge

Let’s practice!

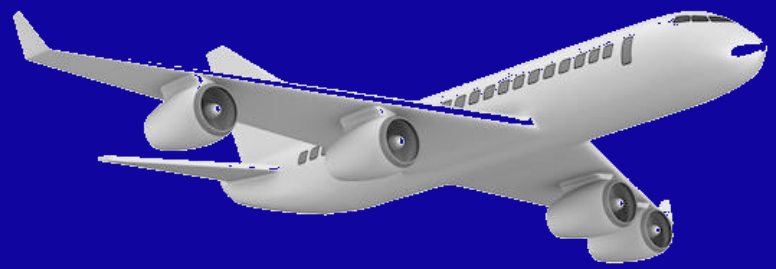
ASML

Challenge 1: Become a prompt artist!

Homework of our Session 1 - Personal Productivity

Challenge | Challenge 1

Let's imagine that you're a food and facility manager at an airline. Now, that Copilot is taking of, and you secured your boarding pass (better known as your Copilot license), you onboarded the Copilot flight. It turns out using Copilot is really taking you places and is valuable within your job. Let's open the suitcase of possibilities, by performing a challenge per training session.

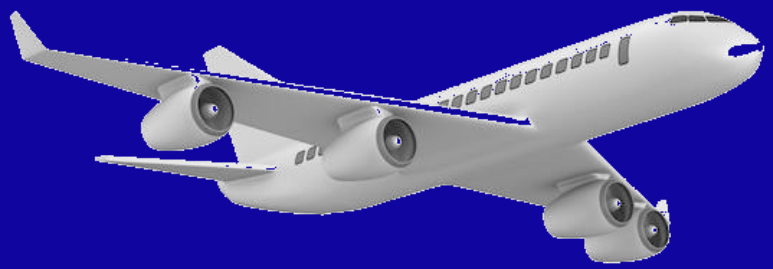


Challenge 1: Become a prompt artist!

Homework of our Session 1 - Personal Productivity

Challenge | Challenge 1

As the food and facility manager of this airline, you are aware of the food preferences of our customers. One of your responsibilities is defining a quarterly menu which the catering company will carry out.



THE CHALLENGE

Let Copilot generate a menu for next quarter in **M365 Copilot Chat** which can be served at the international flights. Try out different levels of prompting.

Keep in mind that the airline has a clear vision on healthy food and sustainability, when defining your prompt.

RESULT

Please share your output as a reply to the Challenge 1 related Viva Engage post.

- The final prompt you used
- Upload the menu (or a screenshot of the menu) which you generated
